2023

NAVIGATING PROFITABILITY THROUGH OPERATIONAL ADVANCEMENTS FOR SUSTAINABLE GROWTH

MENAVIGASI PROFITABILITAS MELALUI
KEMAJUAN OPERASIONAL UNTUK
PERTUMBUHAN YANG BERKELANJUTAN

Sepanjang tahun, Perseroan melakukan langkah-langkah strategis memanfaatkan kemajuan operasional untuk mencapai profitabilitas sekaligus memastikan pertumbuhan berkelanjutan di tengah pemulihan industri penerbangan yang melaju kencang setelah pandemi mereda.

Dengan memprioritaskan keunggulan operasional dan stabilitas keuangan, Perseroan berhasil memperluas jangkauannya di luar *captive market*, mendiversifikasi basis pelanggan, dan merambah ke sektor-sektor selain aviasi. Diversifikasi strategis ini memungkinkan Perseroan memanfaatkan peluang pendapatan baru, memastikan kelangsungan bisnis bahkan di tengah tantangan seperti kelangkaan suku cadang atau ketegangan geopolitik.

Throughout the year, the Company strategically leveraged operational advancements to achieve profitability while ensuring sustainable growth in the aviation industry's pace of recovery following the pandemic's subsiding.

By prioritizing operational excellence and financial stability, the Company successfully expanded its capabilities beyond its captive market, diversifying its customer base and venturing into sectors beyond aviation. This strategic diversification enabled the Company to capitalize on new revenue opportunities, ensuring business continuity even amid challenges like parts scarcity or geopolitical tensions.

2022

FINANCIAL AND OPERATIONAL RESTRUCTURING FOR SUSTAINABLE RECOVERY IN THE NEW ERA

RESTRUKTURISASI FINANSIAL DAN
OPERASIONAL SEBAGAI UPAYA PEMULIHAN
BERKELANJUTAN DI ERA YANG BARU

Pada tahun 2022 berhasil mencetak laba bersih setelah sebelumnya mengalami kerugian akibat pandemi.

Pencapaian laba bersih didorong oleh kinerja pendapatan yang meningkat seiring dengan pemulihan industri *airline* secara keseluruhan, terutama dari Grup Afiliasi Garuda. Tentunya Perseroan juga terus mengembangkan bisnis untuk berekspansi menjangkau bisnis lain yang dapat bertahan dari pandemi. Salah satu *milestone* penting adalah ketika Perseroan dipercaya oleh Kementerian Pertahanan untuk melakukan Modernisasi C130H. Seiring dengan hal tersebut, Perseroan juga dipercaya Lockheed Martin untuk merawat pesawat Hercules di Indonesia sehingga meningkatkan penetrasi pasar GMF di industri pertahanan nasional.

Strategi penetrasi pasar, memperluas jangkauan untuk meraih pasar baru yang lebih menguntungkan, juga diiringi oleh upaya restrukturisasi. Tidak bisa dipungkiri bahwa GMF masih belum mencapai tingkat kesehatan finansial dan operasional seperti sebelum pandemi. Dalam upayanya untuk memulihkan diri saat situasi kembali positif maka upaya restrukturisasi menjadi penting untuk memberikan ruang gerak yang cukup bagi Perseroan menumbuhkan usaha.

In 2022 the Company succeeded in generating profit after having to suffer from loss due to the pandemic.

This net profit was driven by our revenue after it went up following the recovery of the airline industry as a whole, especially from the Affiliated Group of Garuda. In addition, the Company kept improving its business, expanding to reach other segment that can withstand the pandemic. An important milestone was when the Company was trusted by the Ministry of Defense to carry out the C130H Modernization. Along with this, the Company is also entrusted by Lockheed Martin to maintain Hercules aircraft in Indonesia and therefore increasing GMF's market penetration in the national defense industry.

The market penetration, coupled with expansion to reach the new, more profitable markets, were also accompanied by restructuring efforts. It is a fact that GMF has not yet reached its pre-pandemic soundness level in terms of finance and operation. In its efforts to recover when the situation returns to positive, restructuring is important to give the Company enough space to maneuver in growing its business.

Laporan Dewan Komisaris

Board of Commissioners' Report

Pemegang Saham dan Pemangku Kepentingan yang Terhormat,

Dewan Komisaris menyampaikan laporan pengawasan terhadap pengelolaan GMF sepanjang 2025 dan kami memandang bahwa Perseroan telah mencatatkan pencapaian yang positif dan terus bertumbuh.

Perseroan mampu memanfaatkan peluang dari peningkatan segmen pasar grup afiliasi (GA) Garuda Indonesia Group dan non-grup afiliasi (NGA). Selain itu, Perseroan juga telah menyelesaikan proses penambahan aset tetap inbreng lahan oleh Angkasa Pura sesuai dengan prinsip tata kelola yang baik dan regulasi yang berlaku.

Tahun 2025 telah menjadi tahun yang produktif dan memperkuat struktur usaha GMF untuk pertumbuhan yang lebih berkelanjutan ke depannya.

PENILAIAN KINERJA DIREKSI DALAM MENGELOLA PERSEROAN

Dewan Komisaris menilai kinerja Direksi berdasarkan realisasi RKAP dan KPI operasional/keuangan. Dasar penilaian yang digunakan pada praktiknya mencakup perbandingan antara realisasi dengan target finansial dan operasional yang secara garis besar mencakup pendapatan dan laba bersih. Dewan Komisaris juga menggunakan basis KPI kolektif dan individual yang ditelaah Kantor Akuntan Publik (KAP) sesuai PER-2/MBU/03/2023.

Penilaian terhadap kinerja Direksi juga tidak dapat dilepaskan dari dinamika eksternal yang membentuk ekosistem industri penerbangan sepanjang tahun, termasuk industri MRO sebagai pendukung.

Badan Pusat Statistik (BPS) mencatat bahwa ekonomi Indonesia tumbuh 5,11% (c-to-c) secara kumulatif. Pertumbuhan ini ekonomi berdampak positif terhadap permintaan perjalanan udara, terutama selama musim puncak seperti liburan sekolah, perayaan keagamaan, dan periode Haji. Situasi ini mendorong maskapai penerbangan untuk mereaktivasi armada pesawat mereka secara lebih intensif untuk memenuhi permintaan pasar.

Dear Esteemed Shareholders and Stakeholders,

The Board of Commissioners hereby presents its supervisory report on the management of GMF throughout 2025 and notes that the Company has delivered positive and sustained growth.

The Company successfully capitalized on opportunities arising from increased demand in both the affiliated group (GA) of the Garuda Indonesia Group and non-affiliated group (NGA). In addition, the Company completed the inbreng of land assets contributed by Angkasa Pura in accordance with good governance principles and applicable regulations.

Overall, 2025 has been a productive year, strengthening GMF's business structure for more sustainable growth ahead.

ASSESSMENT OF THE BOARD OF DIRECTORS' PERFORMANCE IN MANAGING THE COMPANY

The Board of Commissioners evaluates the performance of the Board of Directors based on the realization of the RKAP and operational/financial KPIs, including comparisons between actual results and financial and operational targets, particularly revenue and net profit. The assessment also incorporates both collegial and individual KPIs, reviewed by the Public Accounting Firm (KAP) in accordance with PER-2/MBU/03/2023.

Evaluation of the performance of the Board of Directors is inseparable from external dynamics shaping the aviation ecosystem, including the MRO industry as a supporting sector.

According to the Statistics Indonesia (BPS), Indonesia's economy grew by 5.11% (c-to-c) in 2025, positively impacting air travel demand, especially during peak seasons such as school holidays, religious festivities, and the Hajj period. This encouraged airlines to reactivate their fleets more intensively to meet market demand.

Bagi Perseroan, dampaknya positif karena terlihat dari peningkatan pangsa pasar GA dan NGA terhadap keseluruhan pendapatan Perseroan. Pendapatan dari GA mencapai USD357.37 juta dan meningkat 6.84% dibandingkan tahun sebelumnya USD317.74 juta. Pendapatan dari NGA adalah USD134.51 juta dan meningkat 21,30% dibandingkan USD103.48 juta pada tahun sebelumnya. Kedua segmen mengalami peningkatan, namun yang menarik adalah pada segmen NGA. Selain persentase peningkatan pendapatan yang melebihi 20%, segmen NGA juga meningkatkan kontribusinya terhadap pendapatan keseluruhan yaitu 26.99% dibandingkan 24.57% pada tahun sebelumnya.

Sebagai catatan, pelanggan Perseroan di pasar NGA adalah dari BUMN dan pihak swasta yang mencakup maskapai kargo internasional, *lessor*, perusahaan pembangkit listrik, dan beberapa maskapai internasional lainnya. Peningkatan di segmen ini menjadi salah satu realisasi dari tema Laporan Terintegrasi 2025 yang berfokus pada kata kunci "*Diversifying Excellence*". Melalui diversifikasi, Perseroan mengembangkan kapabilitas untuk mencari sumber pendapatan baru di segmen *Government & Industrial Solutions* di luar industri penerbangan, namun masih dalam *core business* MRO yang dijalankan Perseroan.

Hasilnya positif karena pada tahun 2025 likuiditas Perseroan juga menguat. Hal ini terlihat dari penerimaan kas dari pelanggan mencapai USD502.02 juta dan meningkat 26.20% dibandingkan USD397.79 juta pada tahun sebelumnya. Peningkatan kas juga tidak terlepas dari pendapatan yang meningkat 16.77% menjadi USD491.88 juta dibandingkan USD421.22 pada tahun sebelumnya. Laba tahun berjalan juga meningkat, yaitu 26.27% dan mencapai USD33.97 juta dibandingkan USD26.90 pada tahun sebelumnya. Dibandingkan target, pencapaian pendapatan dan laba masing-masing adalah 109% dan laba 125% dari target.

Dengan demikian, Dewan Komisaris memandang kinerja Direksi pada tahun 2025 adalah positif, terutama dari sisi kinerja keuangan dan progres atas sejumlah agenda strategis Perseroan. Salah satu catatan penting adalah pelaksanaan aksi korporasi berupa inbreng lahan seluas 973.120 m² dari PT Angkasa Pura Indonesia yang berdampak pada perubahan struktur saham dan modal Perseroan.

PENGAWASAN TERHADAP IMPLEMENTASI STRATEGI PERSEROAN

Dewan Komisaris mengawasi implementasi strategi Perseroan melalui kombinasi beberapa mekanisme, yaitu pembahasan berkala dalam rapat gabungan dengan Direksi, telaah komite di bawah Dewan Komisaris, pemantauan profil risiko dan tindak lanjut audit, serta penelaahan atas perencanaan korporasi.

For the Company, the impact is positive which translated into increased contributions from both GA and NGA segments. Revenue from GA reached USD357.37 million, up 6.84% from USD317.74 million in the previous year, while NGA revenue grew 21.30% to USD134.51 million from USD103.48 million in the previous year. Both segments improved, but what's interesting is on the NGA segment. In addition to the increase in revenue beyond 20%, NGA's contribution to total revenue also increased, accounting to 26.99% from 24.57% compared to the previous year.

For information, the Company's customers in the NGA market are from SOEs and private sectors consist of international cargo airlines, lessors, power generation companies, and several other international airlines. The increase in this segment represents the key theme of the 2025 Integrated Report, "*Diversifying Excellence*." Through diversification, the Company improves its capabilities to seek new revenue sources in the Government & Industrial Solutions outside the aviation industry, while still remaining within the Company's core MRO business.

The results are positive, as in 2025 the Company's liquidity also strengthened. This is reflected in cash receipts from customers reaching USD502.02 million, increasing by 26.20% compared to USD397.79 million in the previous year. The increase in cash is also inseparable from revenue growth of 16.77% to USD491.88 million compared to USD421.22 million in the previous year. Profit for the year also increased by 26.27%, reaching USD33.97 million compared to USD26.90 million in the previous year. Compared to the target, the achievement of revenue and profit reached 109% and 125% of the target, respectively.

Accordingly, the Board of Commissioners views the performance of the Board of Directors in 2025 as positive, particularly in terms of financial performance and progress on several of the Company's strategic agendas. One important note is the corporate action in the form of an inbreng (asset participation) of land covering 973,120 m² from PT Angkasa Pura Indonesia, which had an impact on changes in the Company's shareholding structure and capital.

SUPERVISION OVER THE IMPLEMENTATION OF THE COMPANY'S STRATEGY

The Board of Commissioners supervises the implementation of the Company's strategy through a combination of several mechanisms, including periodic discussions in joint meetings with the Board of Directors, reviews by committees under the Board of Commissioners, monitoring of the risk profile and audit follow-ups, as well as reviews of corporate planning.

Rapat gabungan telah dilakukan 11 kali dengan agenda utama meliputi pembahasan kinerja secara periodik, perkembangan proyek dan inisiatif strategis, serta RKAP dan RJPP. Sepanjang tahun, Dewan Komisaris menekankan pentingnya implementasi strategi secara *prudent* dan berbasis mitigasi risiko yang memadai. Kami memberikan arahan dan klarifikasi atas laporan kinerja periodik, penelaahan komite atas proyek strategis dan dokumen perencanaan perusahaan, serta memberikan tanggapan atas aksi/keputusan tertentu.

Secara garis besar, kami mendukung arah strategi Perseroan, termasuk pemulihan kinerja, penguatan ekuitas, peningkatan pendapatan NGA, dan penyusunan *roadmap* jangka menengah-panjang. Secara khusus, kami mendukung pengembangan Aerospace Park Kertajati, rencana ekspansi bisnis di Oman, hingga pemberian persetujuan bersyarat atas rencana KSO dengan BIJB.

Namun demikian, Dewan Komisaris juga mencatat sejumlah area yang perlu mendapat perhatian lebih lanjut. Perhatian khusus diberikan pada kualitas laba dan ketergantungan pada pendapatan GA. Perseroan juga perlu memperhitungkan efisiensi biaya material dan subkontrak, serta ketidakcapaian beberapa indikator SLA operasional. Dewan Komisaris juga mengingatkan bahwa struktur permodalan saat ini masih terbelang rentan sehingga perlu didukung dengan penguatan pengendalian internal, dan penguatan cash management.

Pemberian rekomendasi dan nasihat, serta keputusan Dewan Komisaris tidak hanya dilakukan secara lisan dalam forum rapat, tetapi juga secara tertulis melalui keputusan, tanggapan, dan telaah komite.

PENERAPAN TATA KELOLA PERUSAHAAN

Dewan Komisaris memandang penerapan tata kelola perusahaan sebagai aspek penting untuk mendukung keberlangsungan usaha. Pada tahun 2025, rekomendasi utama Dewan Komisaris terhadap penerapan tata kelola berpusat pada penilaian praktik tata kelola sesuai regulasi, penguatan pengendalian internal, penyempurnaan kebijakan manajemen risiko, serta percepatan penyelesaian kebijakan kepatuhan.

Secara khusus mengenai penerapan sistem pengendalian internal, Dewan Komisaris memandang bahwa penerapannya telah berjalan optimal dan perlu terus diperkuat, khususnya dalam aspek pengendalian proses, tindak lanjut temuan audit, serta penguatan kepatuhan dan tata kelola. Pelaksanaan *Whistleblowing System* (WBS) juga menjadi aspek penting untuk memastikan integritas seluruh Insan GMF. Penerapannya sudah baik di 2025 dan diharapkan dapat terus diperkuat agar semakin optimal dalam mendukung budaya kepatuhan dan tata kelola Perseroan.

Joint meetings were held 11 times, with main agendas covering periodic performance, progress of projects and strategic initiatives, as well as the RKAP and RJPP. Throughout the year, the Board of Commissioners emphasized the importance of implementing strategies prudently and based on risk mitigation. We provided direction and clarification on periodic reports, committee reviews of strategic projects and corporate planning documents, and responses to certain actions or decisions.

In general, we support the Company's strategic direction, including performance recovery, equity strengthening, increased NGA revenue, and the preparation of a medium to long-term roadmap. Specifically, we support the development of the Aerospace Park Kertajati, business expansion plans in Oman, and the conditional approval of the proposed KSO with BIJB.

Nevertheless, the Board of Commissioners views that several areas requiring further attention. Particular focus is given to revenue quality and dependence on GA revenue. The Company also needs to consider the efficiency of material and subcontracting costs, as well as the suboptimal performance of several operational SLA indicators. The Board of Commissioners also reminds that the current capital structure remains relatively vulnerable and therefore needs to be supported by stronger internal control, and improving cash management.

The provision of recommendations and advice, as well as decrees of the Board of Commissioners, is carried out not only verbally in meeting forums but also in writing through resolutions, responses, and committee reviews.

IMPLEMENTATION OF CORPORATE GOVERNANCE

The Board of Commissioners views the implementation of corporate governance as a critical aspect in supporting business sustainability. In 2025, the Board of Commissioners' key recommendations on governance implementation focused on assessing governance practices in line with regulations, strengthening internal controls, refining risk management policies, and accelerating the completion of compliance policies.

Specifically, regarding the implementation of the internal control system, the Board of Commissioners considers that it has been carried out optimally and should continue to be strengthened, particularly in terms of process controls, follow-up on audit findings, and the reinforcement of compliance and governance. The implementation of the Whistleblowing System (WBS) is also an important aspect in ensuring the integrity of all GMF personnel. Its implementation in 2025 has been satisfactory and is expected to be further strengthened to support the Company's culture of compliance and governance.

Dalam pengawasan terhadap tata kelola dan jalannya Perseroan, Dewan Komisaris didukung oleh komite pendukung yang terdiri dari Komite Audit, Komite Pemantau Risiko dan Tata Kelola Terintegrasi (KPRTKT), dan Komite Nominasi dan Remunerasi (KNR). Secara umum, kinerja komite-komite adalah baik yang dinilai dari keaktifan dan fungsional komite, termasuk hasil telaah dan rekomendasi tertulis yang digunakan Dewan Komisaris dalam menjalankan fungsi pengawasan.

Komite Audit memberikan telaah atas jalannya audit secara keseluruhan, sementara KNR melakukan telaah atas evaluasi kinerja Direksi dan remunerasi. KPRTKT telah melakukan penilaian dan penguatan terhadap sistem manajemen risiko dan pengendalian internal. Dengan demikian, komite-komite telah memberikan dukungan substantif bagi Dewan Komisaris dalam menjalankan fungsi pengawasan dan pemberian nasihat.

PROSPEK USAHA

Situasi tahun 2026 akan dipengaruhi oleh konflik geopolitik yang semakin memanas sehingga berdampak pada rantai pasok secara keseluruhan. Situasi ini dapat menjadi katalis yang menyebabkan disrupsi pada optimisme pertumbuhan pasar MRO global dengan pertumbuhan rata-rata 2,8% per tahun hingga mencapai USD157 miliar pada 2035, menurut data Global Fleet and MRO Market Forecast Oliver Wyman.

Dewan Komisaris memandang Direksi telah menyiapkan langkah-langkah yang relevan untuk 2026. Perhatian terhadap kondisi global menjadi faktor penting, namun fokus untuk menjalankan rencana bisnis utama akan terus dijalankan secara konsisten ke depannya. Hal tersebut mencakup penguatan struktur permodalan, diversifikasi pendapatan NGA, serta pengembangan proyek strategis.

Kami mendukung rencana-rencana Perseroan, dan mengingatkan Direksi untuk memastikan kualitas pertumbuhan, stabilitas arus kas, kolektibilitas piutang, keberhasilan penetrasi pasar NGA. Selain itu, mitigasi risiko terhadap kondisi global serta kehati-hatian dalam ekspansi strategis diharapkan akan menjadi kunci untuk menjaga produktivitas usaha.

BUSINESS PROSPECTS

The outlook for 2026 will be influenced by escalating geopolitical conflicts, which may disrupt global supply chains. The Board of Commissioners views that the Board of Directors has prepared relevant measures for 2026. Attention to global conditions remains important, however, the focus on executing core business plan will continue going forward. This includes strengthening the capital structure, diversifying NGA revenue, and developing strategic projects.

We support the Company's plans and remind the Board of Directors to ensure the quality of growth, stability of cash flows, collectability of receivables, and successful penetration of the NGA market. In addition, risk mitigation in response to global conditions and prudence in strategic expansion are expected to be key factors in maintaining business productivity.

Sejalan dengan pertumbuhan ekonomi Indonesia, permintaan atas perjalanan udara juga meningkat, terutama pada saat *peak season* seperti libur sekolah, hari besar keagamaan, maupun pada saat periode Haji. Berdasarkan laporan Air Passenger Market Analysis IATA tahun 2025, lalu lintas udara komersial global meningkat 5.7% dibandingkan tahun 2024.

Pertumbuhan industri penerbangan global menunjukan tren positif berdasarkan data Global Fleet and MRO Market Forecast Oliver Wyman tahun 2025. Pada awal 2025, armada global beroperasi dengan jumlah mencapai 29,000 pesawat dan diproyeksikan naik sekitar 32% menjadi ±38,300 pesawat pada 2035 (CAGR 2.8%). Industri MRO global diperkirakan tumbuh 15% dari USD104 miliar tahun 2024 menjadi USD120 miliar tahun 2025. Asia masuk dalam tiga area dengan nilai pasar terbesar mencapai USD16 miliar tahun 2025, atau sekitar 14% dari pasar MRO Global.

Dear Esteemed Shareholders and Stakeholders,

In 2025, GMF recorded positive financial performance with the achievement of its net profit target. The ability to capture business growth opportunities, combined with efficiency strategies, enabled GMF to navigate 2025 with satisfactory results.

We hereby present the Board of Directors' Report as our accountability in managing the Company from both operational and financial perspectives in relation to the Annual Report, as well as from the sustainability perspective in relation to the Sustainability Report. All statements in this Board of Directors' Report covers both reports as an integrated whole within this Integrated Report for the 2025 reporting year.

EXTERNAL IMPACTS ON THE COMPANY'S PERFORMANCE

Statistics Indonesia (BPS) recorded that Indonesia's economy grew by 5.39% (y-on-y) in the fourth quarter of 2025 and 5.11% (c-to-c) throughout 2025.

In line with Indonesia's economic growth, demand for air travel also increased, particularly during peak seasons such as school holidays, religious holidays, and the Hajj period. According to the 2025 Air Passenger Market Analysis report by IATA, global commercial air traffic increased by 5.7% compared to 2024.

Global aviation industry growth also showed a positive trend based on the 2025 Global Fleet and MRO Market Forecast by Oliver Wyman. At the beginning of 2025, the global fleet in operation reached 29,000 aircraft and is projected to increase by approximately 32% to around 38,300 aircraft by 2035 (CAGR 2.8%). The global MRO industry is estimated to grow by 15%, from USD104 billion in 2024 to USD120 billion in 2025. Asia ranks among the three largest market regions with a market value of USD16 billion in 2025, or approximately 14% of the global MRO market.

Tren pertumbuhan juga berpengaruh pada tren keberlanjutan yang semakin berkembang. Industri MRO diharapkan berkontribusi melalui pengelolaan limbah yang lebih hijau, serta penggunaan sumber energi yang lebih efisien. Perhatian terhadap aspek lingkungan juga harus diiringi oleh perhatian terhadap aspek keselamatan operasional dan sosial terhadap ribuan tenaga kerja.

GMF menyambut baik tren pertumbuhan dan keberlanjutan ini yang mencerminkan pemulihan dan ekspansi industri aviasi yang semakin solid, serta berdampak positif terhadap kebutuhan layanan perawatan pesawat. Dampaknya juga terasa positif bagi GMF yang mencatatkan pertumbuhan kinerja pada tahun 2025 dibandingkan tahun sebelumnya.

PERAN DIREKSI DALAM PENENTUAN DAN PENGENDALIAN PENERAPAN STRATEGI USAHA

Peran kami sebagai Direksi adalah dengan berperan aktif menetapkan arah strategis dan prioritas pertumbuhan bisnis Perusahaan. Kami melakukan hal tersebut dengan berdasarkan kepada kebijakan strategis yang telah dituangkan dalam Rencana Jangka Panjang Perusahaan (RJPP) dan Rencana Kerja dan Anggaran Perusahaan (RKAP). RKAP ditetapkan berdasarkan Laporan Manajemen Triwulanan yang memuat ketercapaian dan progres implementasi strategi jangka panjang. RKAP yang berlaku untuk tahun 2025 telah disahkan oleh Direksi dan Dewan Komisaris.

Dalam praktik kesehariannya, kami memastikan adanya perpaduan yang kuat dan selaras antar seluruh unit kerja terkait untuk mendukung pencapaian target korporasi secara terintegrasi dan berkelanjutan. Inisiatif tersebut dilakukan dengan memonitor penerapan strategi secara berkala melalui mekanisme tata kelola yang terstruktur.

Secara bulanan, Perusahaan menyelenggarakan *Monthly Review* Korporasi yang dihadiri oleh Direksi dan para Group Head. Forum ini tidak hanya berfungsi sebagai sarana pengawasan kinerja, tetapi juga sebagai wadah untuk mengidentifikasi *root cause* atas isu-isu strategis maupun operasional, serta merumuskan solusi dan rencana tindak lanjut yang terukur.

Perusahaan memiliki *taxonomy meeting* yang terstruktur, sehingga *Monthly Review* Korporasi diturunkan ke dalam Rapat Direktorat mingguan. Melalui forum ini, Direksi secara aktif memastikan kesinambungan antara arah strategis dan implementasi operasional, termasuk pengawasan eksekusi program, tindak lanjut *action plan*, serta pengendalian risiko di masing-masing area tanggung jawab agar tetap selaras dengan target yang telah ditetapkan.

Growth trends also influence the increasing emphasis on sustainability. The MRO industry is expected to contribute through greener waste management and more efficient energy use. Attention to environmental aspects must also be accompanied by attention to operational safety and social responsibility toward thousands of workers.

GMF welcomes these growth and sustainability trends, which reflect the strengthening recovery and expansion of the aviation industry and positively impact the demand for aircraft maintenance services. This trend also had a favorable impact on GMF, which recorded improved performance in 2025 compared to the previous year.

ROLE OF THE BOARD OF DIRECTORS IN STRATEGY FORMULATION AND CONTROL

As the Board of Directors, our role is to actively determine the Company's strategic direction and business growth priorities. This is carried out based on strategic policies outlined in the Company's Long-Term Corporate Plan (RJPP) and the Annual Work Plan and Budget (RKAP). The RKAP is established based on the Quarterly Management Report, which contains achievements and progress in implementing long-term strategies. The RKAP for 2025 has been approved by both the Board of Directors and the Board of Commissioners.

In daily practice, we ensure strong alignment and collaboration among all relevant work units to support the achievement of corporate targets in an integrated and sustainable manner. These initiatives are implemented by periodically monitoring the implementation of strategies through structured governance mechanisms.

On a monthly basis, the Company holds a Corporate Monthly Review attended by the Board of Directors and Group Heads. This forum not only serves as a performance monitoring platform but also as a forum to identify root causes of strategic and operational issues, as well as to formulate measurable solutions and follow-up plans.

The Company maintains a structured meeting taxonomy, whereby the Corporate Monthly Review is cascaded into weekly Directorate Meetings. Through this forum, the Board of Directors actively ensures alignment between strategic direction and operational implementation, including overseeing program execution, follow-up actions, and risk control in each area of responsibility to remain aligned with established targets.

STRATEGI MERAIH PENCAPAIAN POSITIF

Dengan mempertimbangkan pertumbuhan industri penerbangan dan kondisi terkini Perusahaan, Direksi telah menetapkan strategi peningkatan kinerja operasional dan keuangan sebagai berikut:

- Transformasi Operasional
- Optimasi Arus Kas
- Perbaikan Ekuitas
- Pengembangan Teknologi
- Pertumbuhan Bisnis yang Profitabel

Transformasi operasional dilakukan untuk meningkatkan kinerja operasional melalui penguatan pada aspek *Quality, Cost & Delivery* (QCD), penguatan manusia, dan manajemen rantai pasok.

GMF melakukan peningkatan *operational excellence* melalui program perbaikan *Turn Around Time* (TAT), peningkatan profitabilitas pekerjaan, penguatan manajemen *supply chain*, serta pengembangan kompetensi dan produktivitas SDM. Selain itu, dilakukan peningkatan pengelolaan fasilitas, *tools & equipment*, lingkungan kerja, serta penerapan *continuous improvement*. GMF juga melaksanakan program reaktivasi pesawat dari *Group Affiliation*, baik Garuda Indonesia maupun Citilink, dengan memberikan layanan yang optimal guna memastikan penyelesaian program sesuai target yang ditetapkan.

GMF juga melakukan optimalisasi arus kas melalui percepatan penagihan piutang (*aging receivables*), negosiasi *credit limit & payment term* kepada vendor, serta percepatan proses *billing* dan *invoicing*.

Di 2025, Perseroan melaksanakan perbaikan ekuitas melalui Peningkatan Modal menggunakan Penyertaan Modal Non-Tunai. Proses ini mencakup inbreng lahan dari PT Angkasa Pura Indonesia sebagai aset untuk operasional GMF. Proses ini telah dilakukan menggunakan skema *right issue* atau Hak Memesan Efek Terlebih Dahulu (HMETD).

Penerapan dan adaptasi teknologi juga menjadi salah satu fokus utama di 2025 dalam mendukung keberlangsungan operasional. Strategi ini mencakup peningkatan keamanan siber untuk melindungi data dan sistem operasional, serta pengembangan sistem dan digitalisasi proses kerja guna meningkatkan efektivitas dan daya saing di tengah perkembangan teknologi industri aviasi.

Sebagai upaya mencapai pertumbuhan yang menguntungkan dan berkelanjutan, GMF terus mengembangkan bisnis *Commercial Aviation* dengan memperkuat dukungan terhadap *Group Affiliates* (GA) sebagai *captive market*, sekaligus mendorong peningkatan kontribusi pendapatan dari *Non-Group Affiliates* (NGA). GMF mengadopsi pendekatan yang

STRATEGIES TO ACHIEVE POSITIVE PERFORMANCE

Considering the growth of the aviation industry and the Company's current conditions, the Board of Directors established the following strategies to enhance operational and financial performance:

- Operational Transformation
- Cash Flow Optimization
- Equity Improvement
- Technology Development
- Profitable Business Growth

Operational transformation aims to enhance operational performance through the strengthening of the Quality, Cost & Delivery (QCD) aspects, human resources, and supply chain management.

GMF enhanced operational excellence through programs to improve Turn Around Time (TAT), increase job profitability, strengthen supply chain management, and develop workforce competence and productivity. Additionally, improvements were made in facility management, tools and equipment, the work environment, and the implementation of continuous improvement initiatives. GMF also implemented aircraft reactivation programs for Group Affiliates, including Garuda Indonesia and Citilink, by providing optimal services to ensure the programs were completed according to the established targets.

The Company also optimized cash flow through accelerated receivables collection, negotiation of credit limits and payment terms with vendors, and faster billing and invoicing processes.

In 2025, the Company improved equity through a Capital Increase via Non-Cash Capital Injection. This process included the inbreng (capital injection) of land from PT Angkasa Pura Indonesia as an operational asset for GMF. The process was carried out through a rights issue scheme (HMETD).

Technology implementation and adaptation also became a key focus in 2025 to support operational sustainability. This strategy includes strengthening cybersecurity to protect operational data and systems, as well as developing systems and digitalizing work processes to enhance effectiveness and competitiveness amid technological developments in the aviation industry.

To achieve profitable and sustainable growth, GMF continues to develop its Commercial Aviation business by strengthening support for Group Affiliates (GA) as a captive market while increasing revenue contributions from Non-Group Affiliates (NGA). GMF adopts a balanced approach between GA and NGA with proportional revenue composition targets to diversify income sources,

seimbang antara GA dan NGA dengan target komposisi pendapatan yang proporsional, guna mendiversifikasi sumber pendapatan, menyeimbangkan risiko, dan memastikan keberlanjutan jangka panjang. Selain itu, GMF juga terus mengakselerasi pertumbuhan pada segmen *Government & Industrial Solutions* melalui optimalisasi aktivitas *maintenance*, pengembangan kapabilitas dan kapasitas, serta pencarian sumber pendapatan baru.

Program-program strategis di atas telah mendukung GMF mewujudkan tema korporasi 2025, yaitu *"Strengthen Core and Drive Diversified Growth"* untuk memastikan pencapaian pertumbuhan dilakukan melalui penguatan kualitas dan kapabilitas bisnis inti, sekaligus percepatan pengembangan diversifikasi usaha secara berkelanjutan guna menghasilkan nilai tambah yang berkelanjutan jangka panjang bagi seluruh pemangku kepentingan.

STRATEGI PERSEROAN MENGHADAPI TANTANGAN

Kendala rantai pasok masih menjadi isu utama di 2025. Industri penerbangan menghadapi keterbatasan kapasitas produksi dan keterlambatan pengiriman sehingga jumlah permintaan melebihi pasokan material dan suku cadang yang tersedia.

Ketidakpastian dalam jadwal pengadaan dan kedatangan suku cadang mendatangkan tantangan bagi GMF dalam melakukan pengelolaan keuangan. Bergerak di sektor MRO membutuhkan pengelolaan arus kas secara efektif, terutama terkait pembayaran uang muka dalam jumlah besar sebelum suku cadang dapat diperoleh. Hal ini semakin menyulitkan karena waktu kedatangan suku cadang sering kali tidak pasti.

Selain itu, kekurangan tenaga kerja masih menjadi ancaman serius bagi industri MRO. Seiring dengan meningkatnya aktivitas penerbangan global, kebutuhan tenaga mekanik dan teknisi terus meningkat, sementara ketersediaannya masih terbatas. Kondisi ini menambah tekanan operasional bagi GMF.

Dalam mengatasi kendala rantai pasok, GMF meningkatkan proses perencanaan melalui evaluasi periodik dan standarisasi *planning*, pemenuhan material dengan skema *consignment* dan *Just in Time*, negosiasi *payment terms & credit limit*, peningkatan *inhouse repair*, serta penyesuaian harga material.

Terkait tantangan tenaga kerja, GMF tidak hanya berfokus pada pemenuhan kebutuhan SDM sesuai *manpower planning*, tetapi juga menjalankan program pengembangan dan retensi karyawan. Selain rekrutmen dan kerja sama dengan lembaga penyedia SDM, GMF memperkuat *capability* dan *leadership development*

balance risks, and ensure long-term sustainability. In addition, GMF continues to accelerate growth in the Government & Industrial Solutions segment through optimization of maintenance activities, development of capabilities and capacities, and exploration of new revenue sources.

These strategic programs supported GMF in realizing the 2025 corporate theme, "Strengthen Core and Drive Diversified Growth," ensuring growth is achieved by strengthening the quality and capabilities of core businesses while accelerating sustainable diversification to generate long-term value for stakeholders.

COMPANY STRATEGIES TO ADDRESS CHALLENGES

Supply chain constraints remained a major issue in 2025. The aviation industry faced limited production capacity and delivery delays, resulting in demand exceeding the available supply of materials and spare parts.

Uncertainty in spare part procurement and delivery schedules created financial management challenges for GMF. Operating in the MRO sector requires effective cash flow management, particularly regarding significant advance payments before spare parts can be obtained. This a challenge, worsened by uncertain spare part arrival schedules.

Additionally, labor shortages remain a serious challenge for the MRO industry. As global aviation activity increases, the demand for mechanics and technicians continues to rise while supply remains limited, increasing operational pressure on GMF.

To address supply chain challenges, GMF improved planning processes through periodic evaluations and planning standardization, material fulfillment through consignment and Just-in-Time schemes, negotiation of payment terms and credit limits, increased in-house repair capabilities, and adjustments to material pricing.

Regarding workforce challenges, GMF focuses not only on fulfilling manpower planning requirements but also on implementing employee development and retention programs. In addition to recruitment and partnerships with workforce providers, GMF strengthens capability and leadership development to ensure organizational

guna menjaga keberlanjutan organisasi. Upaya ini memastikan *transfer knowledge* berjalan optimal dan mendukung kesinambungan operasional serta pertumbuhan bisnis ke depannya.

Tantangan-tantangan tersebut di atas juga menjadi tantangan terkait keberlanjutan karena berhubungan dengan aspek sosial dalam pengelolaan sumber daya manusia secara menyeluruh.

PENCAPAIAN TARGET PERSEROAN

Secara umum, Perseroan berhasil mencatatkan kinerja keuangan yang positif dengan mencapai target. Perseroan membukukan pendapatan senilai USD491.88 juta dari target USD452.69 juta. Selain adanya peningkatan kinerja operasi, pencapaian ini terjadi karena upaya efisiensi yang telah dilakukan di 2025.

Target laba di 2025 berhasil tercapai yaitu USD33.96 juta atau 125% dari target USD27.12 juta. Pencapaian ini terjadi karena pelaksanaan restrukturisasi operasional dan upaya efisiensi yang telah dilakukan sepanjang tahun.

Kinerja operasi dan bisnis yang positif merupakan kontribusi dari peningkatan rata-rata segmen GA dan NGA, serta *Government*.

Selain itu, seluruh *Key Performance Indicators* (KPI) yang telah dicanangkan dalam RKAP 2025 juga berhasil dicapai, menunjukkan disiplin eksekusi dan konsistensi manajemen dalam merealisasikan target yang telah ditetapkan. GMF juga berhasil melaksanakan peningkatan modal melalui Penyerahan Modal Non-Tunai (inbreng lahan) dengan skema *right issue* (HMETD), sehingga semakin memperkuat struktur permodalan dan fleksibilitas keuangan.

PENERAPAN TATA KELOLA PERUSAHAAN YANG BAIK

GMF menjalankan usaha dengan berdasarkan prinsip-prinsip tata kelola yang baik (GCG). Setiap langkah operasional MRO dilakukan dengan menyeimbangkan kepatuhan terhadap regulasi yang berlaku, penerapan kebijakan keselamatan yang ketat, serta efisiensi biaya. Kesemuanya dilakukan dengan berfokus pada strategi pertumbuhan.

Salah satu elemen penting dalam penerapan prinsip-prinsip GCG adalah sinergi yang dibangun oleh Direksi, Dewan Komisaris, Pemegang Saham, karyawan, dan para pemangku kepentingan. Keberadaan organ utama Perseroan yang bergerak secara sinergis memberikan stabilitas pada pengelolaan, pengawasan, serta pengambilan keputusan strategis.

sustainability and effective knowledge transfer to support future operations and business growth.

Those challenges also served as challenges in terms of sustainability since they are related to social aspects of human capital management in a comprehensive manner.

TARGET ACHIEVEMENTS

Overall, the Company recorded positive financial performance and successfully achieved its targets. The Company recorded a net profit of USD491.88 million compared to the target of USD452.69 million. In addition to improved operational performance, this achievement was supported by efficiency initiatives implemented throughout 2025.

The 2025 profit target was successfully achieved at USD33.96 million, or 125% of the USD27.12 million target. The achievement was driven by operational restructuring and efficiency efforts carried out throughout the year.

Positive operational and business performance resulted from increased contributions across the GA, NGA, and Government segments.

Furthermore, all Key Performance Indicators (KPIs) set in the 2025 RKAP were achieved, reflecting disciplined execution and management consistency in realizing the targets. GMF also successfully completed a capital increase through Non-Cash Capital Injection (land inbreng) via a rights issue scheme, further strengthening the Company's capital structure and financial flexibility.

IMPLEMENTATION OF GOOD CORPORATE GOVERNANCE

GMF conducts its business based on Good Corporate Governance (GCG) principles. Each MRO operational step balances regulatory compliance, strict safety policies, and cost efficiency while maintaining a focus on growth strategies.

An important element in implementing GCG principles is the synergy among the Board of Directors, Board of Commissioners, Shareholders, employees, and stakeholders. The synergy among the Company's key governance organs ensures stability in management, supervision, and strategic decision-making.

Direksi memandang bahwa GMF senantiasa melakukan peningkatan secara berkala dalam penerapan prinsip-prinsip GCG. Inisiatif ini dilakukan melalui kepatuhan terhadap regulasi serta ketentuan hukum terkait bisnis yang dijalankannya. GMF senantiasa melakukan *update* terhadap kebijakan regulasi terbaru, dan berupaya memenuhi setiap ketentuan. Sebagai kelanjutan dari upaya pembaharuan praktik GCG secara berkala, GMF melakukan penyempurnaan perangkat dan kebijakan terkait GCG, melakukan sosialisasi regulasi kepada seluruh karyawan dan pemangku kepentingan, serta melaksanakan penilaian tingkat penerapan GCG secara berkala untuk mendukung penerapan GCG agar semakin efektif.

KINERJA KEBERLANJUTAN

Penerapan prinsip keberlanjutan melalui kebijakan ESG (*Environmental, Social, and Governance*) turut mendukung pelaksanaan operasional usaha. Penciptaan nilai jangka panjang pada aspek-aspek operasional yang bersinggungan dengan keberlanjutan memastikan ketahanan bisnis dan pengelolaan reputasi usaha yang positif.

NILAI-NILAI KEBERLANJUTAN

GMF memiliki ringkasan strategi dan kerangka kerja keberlanjutan yang didasarkan pada Visi dan Misi Korporasi, Visi dan Misi Tanggung Jawab Sosial, Nilai Perusahaan (AKHLAK), serta GMF Spirit "You Do Matter". Secara keseluruhan, rangkaian ini menjadi telah mencakup seluruh aspek ekonomi, sosial, dan lingkungan yang penting dalam keberlanjutan, serta aspek tata kelola yang dibutuhkan dalam penerapan ESG.

Sebagai Direksi, kami berkomitmen untuk memastikan bahwa nilai-nilai keberlanjutan selalu menjadi prinsip yang mendasari aktivitas operasional sehari-hari, terintegrasi dalam perencanaan strategis, pengelolaan operasional, serta pengembangan usaha. Kami senantiasa mendorong penerapan praktik operasional yang bertanggung jawab dan mengedepankan aspek keselamatan, berkontribusi terhadap sosial, dan menjaga kelestarian lingkungan.

TANTANGAN DAN PELUANG PENERAPAN KEBERLANJUTAN

Tantangan dan peluang penerapan keberlanjutan di GMF berasal dari berbagai aspek.

Tantangan keberlanjutan yang utama berasal dari operasional MRO. Kekurangan tenaga kerja serta gangguan rantai pasok berdampak pada peningkatan biaya akibat inflasi. Kinerja pelaksanaan K3 yang optimal juga memengaruhi aktivitas operasional agar berjalan dengan lancar.

The Board of Directors believes that GMF continuously improves the implementation of GCG principles through compliance with applicable regulations and legal requirements. GMF regularly updates its policies in line with new regulations and ensures compliance with all provisions. As part of ongoing governance improvement, GMF continuously enhances governance tools and policies, conducts regulatory socialization for employees and stakeholders, and performs periodic GCG implementation assessments to ensure more effective governance practices.

SUSTAINABILITY PERFORMANCE

The implementation of sustainability principles through ESG (*Environmental, Social, and Governance*) policies supports the Company's operational activities. Creating long-term value in operational aspects related to sustainability ensures business resilience and a positive corporate reputation.

SUSTAINABILITY VALUES

GMF has a sustainability strategy and framework based on the Corporate Vision and Mission, Social Responsibility Vision and Mission, Company Values (AKHLAK), and the GMF Spirit "You Do Matter." Collectively, these elements encompass the key economic, social, and environmental aspects of sustainability, as well as governance elements required for ESG implementation.

As the Board of Directors, we are committed to ensuring that sustainability values remain fundamental principles guiding daily operations, strategic planning, operational management, and business development. We continuously encourage responsible operational practices that prioritize safety, contribute to society, and preserve the environment.

SUSTAINABILITY CHALLENGES AND OPPORTUNITIES

Challenges and opportunities in implementing sustainability within GMF comes from various aspects.

The main challenge in terms of sustainability comes from its MRO operation. Workforce shortages and supply chain disruptions increase operational costs due to inflation. Optimal OHS performance is also critical to ensure smooth operations.

Antisipasi dan mitigasi risiko terkait kekurangan tenaga kerja telah disampaikan di pembahasan tantangan sebelumnya.

Terdapat regulasi internal yang ketat mengatur mengenai penerapan K3 secara optimal di aktivitas operasional. Sosialisasi berkala dan penerapan *rewards & punishment* sebagai bagian dari penilaian kinerja individu dan unit senantiasa dilakukan untuk memastikan penerapan K3 yang disiplin di seluruh aspek operasional.

Dalam menghadapi keterlambatan pasokan, Perseroan menerapkan efisiensi di luar biaya-biaya strategis dan memastikan penagihan piutang berjalan lancar. Inisiatif ini terbukti efektif untuk menjaga kinerja keuangan sepanjang tahun 2025.

Peluang datang dari pelaksanaan operasional yang berfokus pada keberlanjutan, terutama dari sisi efisiensi penggunaan energi dan air. Penghematan dalam penggunaan energi listrik, solar, dan air membawa Perseroan mampu melakukan efisiensi biaya secara keseluruhan. Inisiatif ini mendukung pencapaian kinerja positif Perseroan.

RISIKO KEBERLANJUTAN

Pencapaian keberlanjutan juga bergantung pada pengelolaan risiko keberlanjutan. Direksi bertanggung jawab atas pengelolaan dan mitigasi risiko keberlanjutan dengan menetapkan kebijakan, strategi, serta kerangka manajemen risiko yang terintegrasi dengan kegiatan usaha Perseroan, serta memastikan implementasinya di seluruh lini operasi.

GMF mulai mencoba mengaplikasikan penerapan manajemen risiko yang merujuk pada Task Force on Climate-related Financial Disclosures (TCFD) sebagai inisiatif Perseroan mengantisipasi risiko perubahan iklim. Risiko fisik terhadap seluruh aset GMF seperti hangar, peralatan, serta suku cadang, telah menjadi pertimbangan serius dalam menentukan strategi untuk melindungi diri dari risiko fisik yang akut. Selain itu, risiko transisi dari perubahan regulasi dan perhatian global terhadap penerapan operasional yang memperhatikan perubahan iklim juga menjadi perhatian.

Secara keseluruhan, GMF telah memiliki standar operasional untuk mengantisipasi risiko-risiko fisik akut yang mengancam aset Perseroan. GMF juga terus bekerja sama dengan pengelola *Outstation Line Maintenance* untuk memastikan perlindungan terhadap aset dapat berjalan dengan optimal. Terkait dengan risiko transisi dalam hal regulasi dan perhatian global, hal ini telah menjadi komitmen GMF sejak lama sesuai dengan standar operasi yang berkiblat pada standar MRO global.

Anticipation and mitigation measures regarding workforce shortages have been disclosed in the previous statement regarding operational challenges.

Strict internal regulations govern the implementation of OHS across operational activities. Periodic socialization and the application of reward and punishment mechanisms are conducted as part of individual and unit performance evaluations to ensure disciplined OHS implementation.

To address supply delays, the Company implemented cost efficiency outside strategic expenditures and ensured smooth receivables collection, helping maintain financial performance throughout 2025.

Opportunities arise from operations which consider sustainability aspects, particularly through energy and water efficiency initiatives. Savings in electricity, fuel, and water consumption enabled overall cost efficiency, contributing to the Company's positive performance.

SUSTAINABILITY RISKS

Sustainability achievements also depend on effective sustainability risk management. The Board of Directors is responsible for managing and mitigating sustainability risks by establishing policies, strategies, and risk management frameworks integrated into the Company's operations.

GMF has begun adopting risk management practices aligned with the Task Force on Climate-related Financial Disclosures (TCFD) to anticipate climate-related risks. Physical risks affecting GMF assets, such as hangars, equipment, and spare parts, have been carefully considered in strategies to protect against acute physical risks. Transition risks related to regulatory changes and global attention to climate-conscious operations are also considered.

GMF has established operational standards to anticipate acute physical risks threatening Company assets and continues collaborating with Outstation Line Maintenance operators to ensure optimal asset protection. Transition risks related to regulatory developments have long been addressed in line with global MRO standards.

Pemantauan terhadap risiko-risiko tersebut di atas dilakukan secara berkala, disertai dengan tindakan korektif apabila diperlukan.

PENCAPAIAN ASPEK KEBERLANJUTAN

Dari sisi ekonomi, penjelasannya telah disampaikan sebelumnya, yaitu tercapai positif karena GMF mampu mencatatkan kinerja keuangan yang melebihi target.

Dari sisi lingkungan hidup, GMF memiliki target biaya terkait aspek lingkungan mencakup pengelolaan, pemantauan, hingga pelatihan, sosialisasi, dan sertifikasi. Secara keseluruhan, seluruh biaya telah dikeluarkan sesuai dengan target dan memastikan operasional GMF tidak berdampak negatif terhadap lingkungan.

Dari sisi sosial, GMF juga memastikan bahwa operasionalnya sesuai dengan regulasi ketenagakerjaan sehingga tidak terdapat isu material dalam mengelola ribuan tenaga kerja. Terkait dengan aspek sosial terhadap masyarakat, GMF telah menetapkan anggaran untuk melaksanakan program TJSL bagi kehidupan masyarakat dari sisi sosial dan lingkungan. Pada tahun 2025, realisasinya adalah Rp354.440.000 dan terhadap target mencapai 100%.

Selain dari aspek-aspek tersebut, dapat dikatakan bahwa kinerja keberlanjutan Perseroan adalah positif dan mampu mendukung dalam pelaksanaan operasional sepanjang tahun tanpa terhalang isu material.

PROSPEK USAHA

IMF memproyeksikan pertumbuhan ekonomi global mencapai 3,1% pada 2026, dengan ASEAN tumbuh 4,1%. Pertumbuhan ini diharapkan berdampak positif pada peningkatan industri penerbangan global, regional, maupun domestik.

Di Indonesia, selain ditopang daya beli masyarakat, pertumbuhan penerbangan juga didukung oleh pengembangan infrastruktur serta kebijakan pemerintah yang menjaga stabilitas harga tiket. Selaras dengan pertumbuhan ekonomi, permintaan pasar MRO global menunjukkan tren positif. Berdasarkan data Global Fleet and MRO Market Forecast Oliver Wyman tahun 2025, nilai pasar MRO diproyeksikan mencapai USD120 miliar, tumbuh 15% dibanding tahun sebelumnya. Asia Pacific menjadi salah satu pasar terbesar, menciptakan peluang bagi industri MRO Indonesia. Ke depan, pasar MRO global akan tumbuh rata-rata 2,8% per tahun hingga mencapai USD157 miliar pada 2035.

Di sisi lain, industri penerbangan global masih akan menghadapi tantangan dari sisi rantai pasok dan tenaga kerja. Berdasarkan data Global Fleet and MRO Market

BUSINESS PROSPECTS

The 2026 State Budget assumptions target economic growth of 5.2-5.8% amid global economic volatility and geopolitical tensions. The IMF projects global economic growth of 3.1% in 2026, with ASEAN growth reaching 4.1%. This growth is expected to positively impact global, regional, and domestic aviation industries.

In Indonesia, aviation growth is supported not only by consumer purchasing power but also by infrastructure development and government policies maintaining ticket price stability. Aligned with economic growth, global MRO market demand shows positive trends. According to the 2025 Global Fleet and MRO Market Forecast by Oliver Wyman, the MRO market is projected to reach USD120 billion, growing 15% year-on-year. Asia Pacific remains one of the largest markets, creating opportunities for Indonesia's MRO industry. A Brief History of GMF

PENDIRIAN PERSEROAN

Awal Pendirian Perseroan

Perjalanan PT Garuda Maintenance Facility Aero Asia Tbk ("Perseroan" atau "GMF") berawal dari pembentukan Direktorat Teknik Garuda Indonesia di tahun 1949. Setelah lebih dari empat dekade beroperasi sebagai salah satu divisi di bawah Garuda Indonesia, GMF berubah menjadi Strategic Business Unit Garuda Maintenance Facility (SBU-GMF) yang menangani seluruh aktivitas perawatan armada Garuda Indonesia.

Pada tahun 2002, Garuda Indonesia melakukan 'spin-off' terhadap SBU-GMF. Peristiwa ini membuat Perseroan resmi menjadi anak perusahaan Garuda Indonesia dengan nama PT Garuda Maintenance Facility Aero Asia melalui Akta Pendirian No. 93 tanggal 26 April 2002 oleh Notaris Arry Supratno, S.H. Akta tersebut telah diubah dengan perubahan terakhir melalui Akta Pernyataan Keputusan Rapat Perubahan Anggaran Dasar Nomor 2 tanggal 15 Januari 2025 dan susunan pengurus terakhir yang tercantum dalam Akta Pernyataan Keputusan Rapat Nomor 6 tanggal 28 September 2025 oleh Notaris Shanti Indah Lestari, S.H., M.Kn.

COMPANY ESTABLISHMENT

The Company's Establishment Journey

The history of PT Garuda Maintenance Facility Aero Asia Tbk (the "Company" or "GMF") began with the establishment of Garuda Indonesia's Technical Directorate in 1949. In 2002, Garuda Indonesia spin-offs SBU-GMF into a subsidiary. This event made the Company officially become a subsidiary of Garuda Indonesia, using PT Garuda Maintenance Facility Aero Asia as its name, under the Establishment Deed No. 93 of April 26, 2002, made by Notary Arry Supratno, S.H. The deed has been changed several times with the latest amendment through the Deed of Meeting Resolution of Articles of Association Amendment Number 2 dated January 15, 2025, and its final management, which stipulated in the Deed of Meeting Resolution Number 6 dated September 28, 2025, made by Notary Shanti Indah Lestari, S.H., M.Kn.

Tinjauan Perekonomian dan Industri

Industrial and Economic Review

Dihadapkan pada dinamika ekonomi global yang diwarnai oleh meningkatnya kebijakan proteksionisme dan penerapan tarif tinggi yang memicu tensi perdagangan internasional, Indonesia tetap mampu menunjukkan kinerja yang resilien.

Kementerian Keuangan mencatat bahwa sepanjang tahun 2025 Indonesia berhasil membukukan surplus neraca perdagangan sebesar USD46 juta. Pencapaian ini mencerminkan daya tahan sektor perdagangan nasional di tengah tekanan global, yang tidak terlepas dari tetap terjaganya permintaan dari sejumlah mitra dagang utama. Berdasarkan data Badan Pusat Statistik (BPS), beberapa negara mitra utama Indonesia mencatat pertumbuhan ekonomi yang relatif kuat dan bahkan cenderung menguat pada kuartal IV-2025, antara lain Singapura sebesar 5,7%, Malaysia 5,7%, Vietnam 8,5%, dan Korea Selatan 1,5%. Kondisi tersebut turut menopang kinerja ekspor Indonesia, khususnya pada komoditas unggulan, sehingga menjaga keseimbangan neraca perdagangan tetap positif.

Dari sisi domestik, perekonomian Indonesia juga menunjukkan fundamental yang solid, didukung oleh kuatnya aktivitas konsumsi masyarakat dan meningkatnya transaksi ekonomi. Data BPS dan Bank Indonesia (BI) menunjukkan bahwa konsumsi per kapita pada kelompok jasa makanan, minuman, dan akomodasi tumbuh signifikan sebesar 10,66% secara tahunan (YoY), mencerminkan meningkatnya mobilitas dan aktivitas sektor jasa. Sementara itu, konsumsi pada kelompok barang dan jasa lainnya juga mengalami pertumbuhan sebesar 6,11% (YoY), yang mengindikasikan daya beli masyarakat yang tetap terjaga.

Di sisi stabilitas harga, tingkat inflasi tahunan pada Desember 2025 tercatat sebesar 2,92%, yang masih berada dalam kisaran target nasional sebesar 1,5%-3,5%. Kondisi inflasi yang terkendali ini menjadi indikator penting terjaganya stabilitas makroekonomi, sekaligus memberikan ruang bagi dunia usaha untuk terus berkembang dengan tingkat kepastian yang lebih baik.

Industri penerbangan global menunjukkan tren pemulihan dan pertumbuhan yang positif pascapandemi, yang semakin didorong oleh ekspansi pasar di kawasan Asia dan Timur Tengah. Berdasarkan data Global Fleet and MRO Market Forecast 2025 oleh Oliver Wyman, jumlah armada pesawat global pada awal 2025 mencapai sekitar 29.000 unit dan diproyeksikan meningkat sekitar 32% menjadi ±38.300 unit pada tahun 2035, dengan

Amid global economic dynamics marked by rising protectionist policies and the imposition of high tariffs that have heightened international trade tensions, Indonesia has continued to demonstrate resilient performance.

The Ministry of Finance recorded that throughout 2025, Indonesia succeeded in maintaining a trade balance surplus of USD46 million. This achievement reflects the resilience of the national trade sector amid global pressures, supported by sustained demand from several key trading partners. Based on data from the Statistics Indonesia (BPS), a number of Indonesia's major trading partners recorded relatively strong economic growth and even showed strengthening trends in Q4-2025, including Singapore at 5.7%, Malaysia at 5.7%, Vietnam at 8.5%, and South Korea at 1.5%. These conditions supported Indonesia's export performance, particularly in key commodities, thereby maintaining a positive trade balance.

From the domestic side, Indonesia's economy also demonstrated solid fundamentals, supported by strong consumption activity and increased economic transactions. Data from BPS and Bank Indonesia (BI) show that per capita consumption in the food, beverage, and accommodation services category grew significantly by 10.66% year-on-year (YoY), reflecting increased mobility and activity in the service sector. Meanwhile, consumption in other goods and services also grew by 6.11% (YoY), indicating sustained purchasing power among consumers.

In terms of price stability, the annual inflation rate in December 2025 was recorded at 2.92%, remaining within the national target range of 1.5%-3.5%. This controlled inflation level serves as an important indicator of maintained macroeconomic stability, while also providing a conducive environment for businesses to grow with greater certainty.

The global aviation industry has shown a positive recovery and growth trend in the post-pandemic period, increasingly driven by market expansion in Asia and the Middle East. According to the Global Fleet and MRO Market Forecast 2025 by Oliver Wyman, the global aircraft fleet at the beginning of 2025 reached approximately 29,000 units and is projected to grow by around 32% to approximately 38,300 units by 2035, with

tingkat pertumbuhan tahunan gabungan (CAGR) sebesar 2,8%. Pertumbuhan ini mencerminkan meningkatnya permintaan perjalanan udara, khususnya di negara-negara berkembang.

Selain itu, komposisi armada juga menunjukkan pergeseran, di mana pesawat jenis *narrow-body* diproyeksikan semakin mendominasi hingga mencapai 68% pada tahun 2035 dari sekitar 62% saat ini, seiring dengan tren efisiensi operasional maskapai. Pertumbuhan pangsa armada di wilayah Tiongkok, Timur Tengah, dan India juga menjadi indikator penting meningkatnya pusat pertumbuhan baru dalam industri penerbangan global.

Sejalan dengan perkembangan tersebut, industri *Maintenance, Repair, and Overhaul* (MRO) global juga menunjukkan prospek yang semakin positif. Berdasarkan sumber yang sama, nilai pasar MRO global diperkirakan tumbuh sekitar 15%, dari USD104 miliar pada tahun 2024 menjadi USD120 miliar pada tahun 2025. Pertumbuhan ini didorong oleh meningkatnya jumlah armada yang beroperasi, kebutuhan perawatan pesawat yang lebih intensif, serta bertambahnya usia armada di beberapa kawasan.

Asia sendiri menjadi salah satu dari tiga kawasan dengan nilai pasar MRO terbesar, dengan nilai mencapai sekitar USD16 miliar pada tahun 2025 atau setara dengan 14% dari total pasar global. Hal ini menunjukkan bahwa kawasan Asia memiliki peran strategis dalam rantai pasok industri aviasi global.

Bagi Indonesia, kondisi ini menghadirkan peluang yang signifikan untuk mengembangkan industri MRO domestik. Dengan posisi geografis yang strategis, pertumbuhan lalu lintas udara yang terus meningkat, serta dukungan kebijakan pemerintah dalam penguatan industri aviasi, Indonesia berpotensi menjadi salah satu pusat MRO di kawasan. Optimalisasi peluang ini memerlukan peningkatan kapabilitas teknis, investasi dalam infrastruktur dan teknologi, serta penguatan kualitas sumber daya manusia agar mampu bersaing di tingkat regional maupun global.

a compound annual growth rate (CAGR) of 2.8%. This growth reflects rising demand for air travel, particularly in developing countries.

In addition, the composition of the fleet is also shifting, with narrow-body aircraft projected to become increasingly dominant, reaching 68% by 2035 from around 62% currently, in line with airlines' operational efficiency trends. The growing share of fleets in China, the Middle East, and India also indicates the emergence of new growth centers in the global aviation industry.

In line with these developments, the global Maintenance, Repair, and Overhaul (MRO) industry is also showing increasingly positive prospects. Based on the same source, the global MRO market is expected to grow by around 15%, from USD104 billion in 2024 to USD120 billion in 2025. This growth is driven by the increasing number of operating aircraft, greater maintenance needs, and the aging of fleets in several regions.

Asia is among the top three regions with the largest MRO market value, reaching approximately USD16 billion in 2025, or around 14% of the global market. This highlights Asia's strategic role in the global aviation supply chain.

For Indonesia, these conditions present significant opportunities to develop its domestic MRO industry. With its strategic geographic position, increasing air traffic growth, and government support for strengthening the aviation industry, Indonesia has the potential to become one of the MRO hubs in the region. Optimizing this opportunity requires enhancing technical capabilities, investing in infrastructure and technology, and strengthening human capital to compete at both regional and global levels.

Jika dibandingkan dengan kinerja pada tahun sebelumnya, load pekerjaan dari grup afiliasi (GA) menurun sebesar -20% dan non-grup afiliasi (NGA) mengalami peningkatan sebesar -18%. Kondisi ini terjadi karena meningkatkan jumlah pekerjaan dengan skala besar yang memiliki turnaround time (TAT) lebih dari 40 hari, sehingga jumlah event yang dapat diselesaikan dalam periode tersebut menjadi lebih sedikit. Akibatnya, meskipun nilai pekerjaan per proyek cenderung lebih besar, total jumlah event mengalami penurunan dibandingkan tahun sebelumnya.

Compared to the performance of the previous year, the workload from the affiliate group (GA) decreased by -20%, while the non-affiliate group (NGA) experienced an increase of -18%. This condition occurred due to a higher number of large scale projects with turnaround times (TAT) exceeding 40 days. As a result, workshop capacity was largely occupied by longer duration jobs, leading to a lower number of events completed within the period. Consequently, although the value per project tended to be higher, the total number of events decreased compared to the previous year.

Engine Workshop

GMF memiliki fasilitas *Engine Workshop*, *Engine and APU Test Cell*, dan *Engine Services* untuk melakukan perawatan mesin pesawat dan *Auxilliary Power Unit* (APU). GMF juga mampu melakukan perawatan mesin CFM56-5 untuk pesawat seri A320 dan mesin PW100 untuk pesawat seri ATR.

Perseroan mengadopsi konsep 3 Lines Model dalam pengelolaan risiko dan pengendalian internal yang diambil dari prinsip Committee of Sponsoring Organizations of the Treadway Commission (COSO). Unit kerja, sebagai Manajemen Operasional, berperan penting dalam mengendalikan aktivitas kerja di unitnya masing-masing. Risk Management, dengan fungsinya sebagai Manajemen Pengendali, bertugas mengelola risiko korporat secara keseluruhan yang melakukan berbagai aktivitas asesmen dan melakukan monitoring tindakan pengendalian risiko korporat.

PENGENDALIAN INTERNAL UNTUK ASPEK OPERASI DAN KEUANGAN

Manajemen menempatkan individu dalam posisi yang tepat sesuai kompetensi. Terdapat sejumlah pedoman kerja yang telah disusun untuk menjamin adanya standar dalam melaksanakan kerja. Perseroan memiliki berbagai unit bisnis yang dibentuk untuk menjalankan fungsinya masing-masing untuk memastikan adanya pengendalian internal yang memadai yaitu:

- Unit Budget and Control yang bertanggung jawab dalam mengontrol realisasi penggunaan anggaran.
- Unit Security Management yang bertanggung jawab dalam menjamin keamanan Perseroan.
- Unit Financial & Management Accounting, Internal Control, dan Safety Inspection yang bertanggung jawab dalam mendesain dan mengembangkan kerangka manajemen risiko serta mengontrol implementasinya.
- Unit Quality System & Auditing yang bertanggung jawab dalam melakukan kontrol kualitas terhadap material dan produk Perseroan.
- Unit Corporate Legal dan Unit Aircraft Quality Performance Monitoring yang bertanggung jawab dalam menjamin kepatuhan Perseroan sesuai dengan regulasi yang berlaku baik dari pemerintah maupun otoritas penerbangan.
- Unit Human Capital Management dan Unit Strategic Management Office yang bertanggung jawab mendesain struktur organisasi.

Direksi berperan untuk mengarahkan sistem pengendalian internal. Dewan Komisaris bertindak sebagai pengawas untuk memastikan jalannya Perseroan dan memberikan arahan serta nasihat yang diperlukan untuk mencegah adanya penyimpangan. Pihak eksternal seperti KAP, Lembaga Otoritas Penerbangan, Lembaga Sertifikasi Mutu, dan Regulator menjadi pihak independen yang menilai pelaksanaan pengendalian internal Perseroan sesuai bidangnya masing-masing.

ADAPTATION OF COSO PRINCIPLES

The working units, as the Operational Management, play an important role in controlling work activities. With their function as Management Control, Risk Management are tasked with managing corporate risk as a whole that includes assessment and monitoring of corporate risk control measures.

The Management positioned the individuals in the correct position according to their competence. There are several guidelines to ensure work standards work. The Company has various business units to carry out their respective functions to ensure adequate internal control, namely:

The Board of Directors plays a role to direct the internal control system. The Board of Commissioners acts as a supervisor and gives direction and advice to prevent irregularities. External parties such as KAP, Aviation Authority Institutions, Quality Certification Bodies, and Regulators are all independent parties assessing the Company's internal control according to their respective fields.

EVALUASI PENGENDALIAN INTERNAL

Evaluasi terhadap efektivitas pengendalian internal tidak terlepas dari evaluasi terhadap seluruh unit bisnis, terutama unit-unit yang terkait pengelolaan risiko dan audit internal. Tentunya penilaian terhadap masing-masing unit bisnis tersebut dapat dibaca di pembahasan sebelumnya yang ada di Laporan Terintegrasi ini. Akan tetapi, secara garis besar, Perseroan telah memiliki sistem penilaian kinerja masing-masing unit bisnis sebagai bentuk evaluasi dari pencapaian KPI Perseroan secara keseluruhan. Penilaian ini menjadi salah satu dasar evaluasi pengendalian internal yang selalu dimonitor secara berkala.

Seluruh proses pengendalian ini telah dituangkan dalam kebijakan, prosedur bisnis, dan instruksi kerja perusahaan. Aktivitas pengendalian yang lebih rinci juga tertulis pada risk register unit dalam setiap risiko yang telah teridentifikasi.

INTERNAL CONTROL EVALUATION

Evaluation of internal control effectiveness is inseparable from the evaluation of all business units, especially those related to risk management and internal audit. Of course, the assessment of each unit is available in the earlier discussion in this Integrated Report. However, in general, the Company already has an appraisal system for each unit to evaluate overall KPI achievement. This assessment is one of the bases for assessing internal control, which is always monitored periodically.

VIEWS FROM THE BOARD OF COMMISSIONERS AND BOARD OF DIRECTORS

The Board of Commissioners and the Board of Directors consider that the Company's internal control system implementation in 2025 was effective. Control activities were carried out across all levels of the entity, covering various stages of business processes as well as the technology environment. Kendala, Tantangan, dan Peluang [OJK E.5]

Obstacles, Challenges, and Opportunities [OJK E.5]

Secara keseluruhan, upaya keberlanjutan Perseroan sangat erat kaitannya dengan kondisi eksternal yang mempengaruhi industri. Saat ini, industri menghadapi tantangan yaitu kekurangan tenaga kerja serta gangguan rantai pasok, yang berdampak pada peningkatan biaya dan tekanan inflasi.

Kekurangan tenaga kerja menjadi perhatian yang semakin besar seiring dengan tantangan industri yang dihadapkan pada tenaga kerja yang menua serta keterbatasan jumlah teknisi terampil. Kondisi ini menimbulkan kesenjangan pengetahuan yang sulit untuk segera diisi oleh tenaga kerja baru. Kegiatan perawatan pesawat sangat bergantung pada ketersediaan komponen secara berkelanjutan, namun industri mengalami berbagai tantangan rantai pasok, salah satunya akibat ketidakstabilan geopolitik. Kedua faktor tersebut turut mendorong peningkatan biaya dan memperberat tantangan yang dihadapi industri MRO.

Selain itu, perhatian global terhadap isu lingkungan dan keberlanjutan juga semakin meningkat, disertai dengan regulasi yang semakin ketat. Perseroan harus mematuhi perkembangan peraturan lingkungan yang menuntut pengurangan emisi, peningkatan pengelolaan limbah, serta penggunaan material ramah lingkungan dalam proses pemeliharaan. Hal ini tidak hanya menimbulkan tantangan internal, tetapi juga berdampak pada hubungan Perseroan dengan seluruh mitra dalam rantai pasok, seiring dengan upaya bersama untuk bertransisi menuju operasional yang lebih hijau.

Perseroan menyadari bahwa keberlanjutan juga menghadirkan peluang yang signifikan dan berkomitmen untuk senantiasa mematuhi regulasi yang berlaku serta praktik terbaik di industri. Setelah pulih dari krisis industri dan pencapaian kinerja keuangan yang solid dengan laba yang konsisten selama tiga tahun terakhir, Perseroan siap memberikan dampak positif yang lebih besar bagi industri dan masyarakat.

Overall, the Company's sustainability endeavors are closely linked to external conditions shaping the industry. Currently, the industry is facing labor shortages and supply chain disruptions, which have led to rising costs and inflation.

Labor shortages have become a growing concern as the industry struggles with an aging workforce and a lack of skilled technicians, resulting in a knowledge gap that is difficult to fill with new recruits. Aircraft maintenance relies on a steady flow of components and the industry has experienced supply chain challenges, one of which has been driven by geopolitical instability. These two factors have contributed to rising costs and increased challenges in the MRO industry.

In addition, global awareness and regulatory scrutiny regarding environmental and sustainability issues are becoming increasingly stringent. The Company must comply with evolving environmental regulations that require reduced emissions, improved waste management, and the use of eco-friendly materials in maintenance processes. This situation leads not only to internal challenges, but also affects our relationships with supply chain partners, as all parties strive to transition toward greener operations.

We recognize that sustainability also presents significant opportunities, and we are committed to complying with current regulations and industry best practices. As we rebound from industry-wide crises and achieve strong financial performance with consistent profitability over the past three years, we are ready to deliver more positive impacts to the industry and the communities we serve.

STRATEGI [GRI 201-2]

Sebagai perusahaan yang bergerak di bidang *Maintenance, Repair, and Overhaul* (MRO), GMF menyadari bahwa keberhasilan jangka panjang tidak hanya bergantung pada kinerja operasional, tetapi juga pada kemampuan dalam mengelola risiko yang berkaitan dengan keberlanjutan secara menyeluruh, mencakup aspek ekonomi, lingkungan, dan sosial. Dalam kerangka manajemen risiko keberlanjutan, GMF menerapkan pendekatan terintegrasi melalui tahapan identifikasi, pengukuran, pemantauan, dan pengendalian risiko. Proses ini menjadi bagian dari strategi Perusahaan dan mendukung komitmen terhadap keselamatan penerbangan, efisiensi sumber daya, serta tanggung jawab sosial dan lingkungan.

Pada tahap identifikasi, GMF memetakan risiko yang muncul dari kegiatan operasional MRO, kemudian diukur secara kuantitatif dan kualitatif untuk menilai tingkat dampaknya terhadap keberlangsungan usaha. GMF menggunakan pendekatan matriks risiko ESG serta indikator khusus industri aviasi seperti emisi karbon karena penggunaan listrik dan BBM, tingkat insiden keselamatan kerja, dan kepatuhan terhadap regulasi otoritas penerbangan (DGCA, EASA, FAA, dll).

Sebagai bentuk pengendalian risiko, GMF melakukan berbagai upaya strategis seperti pengurangan emisi karbon, efisiensi penggunaan air dan listrik, pengelolaan limbah yang sesuai regulasi, serta peningkatan kapasitas teknisi melalui pelatihan keberlanjutan dan digitalisasi. Melalui manajemen risiko keberlanjutan yang terstruktur, GMF berkomitmen untuk memperkuat ketahanan bisnis, mendukung keselamatan penerbangan, dan menciptakan nilai tambah jangka panjang bagi seluruh pemangku kepentingan, termasuk pelanggan, pemasok, regulator, karyawan, dan masyarakat luas.

Tabel berikut menyajikan risiko fisik dan transisi serta peluang terkait iklim yang telah diidentifikasi, potensi dampaknya terhadap bisnis GMF, serta tindakan yang diambil untuk memitigasi risiko dan memanfaatkan peluang yang ada.

Strategy [GRI 201-2]

As a company engaged in the *Maintenance, Repair, and Overhaul* (MRO) sector, GMF recognizes that long-term success depends not only on operational performance, but also on the ability to manage sustainability-related risks comprehensively covering economic, environmental, and social aspects. Within its sustainability risk management framework, GMF adopts an integrated approach through the stages of risk identification, measurement, monitoring, and control. This process forms an integral part of the Company's strategy and supports its commitment to flight safety, resource efficiency, and social and environmental responsibility.

In the identification stage, GMF maps out risks arising from MRO operations, which are then assessed both quantitatively and qualitatively to determine their impact on business continuity. GMF utilizes an ESG risk matrix approach along with aviation industry-specific indicators such as carbon emissions from electricity and fuel consumption, workplace safety incident rates, and compliance with aviation authority regulations (DGCA, EASA, FAA, etc.).

As part of its risk control efforts, GMF undertakes various strategic initiatives such as reducing carbon emissions, optimizing water and electricity usage, managing waste in accordance with regulations, and enhancing technician capabilities through sustainability training and digitalization. Through its structured sustainability risk management, GMF is committed to strengthening business resilience, supporting flight safety, and creating long-term value for all stakeholders, including customers, suppliers, regulators, employees, and the wider community.

The following table presents the identified climate-related physical and transition risks and climate-related opportunities, their potential impacts on GMF's business, as well as the actions taken to mitigate risks and utilize existing opportunities.

Jumlah nilai ekonomi yang dihasilkan Perseroan didapatkan hanya dari pendapatan usaha yang dapat dianalisa dalam tiga komponen utama yaitu Reparasi dan *Overhaul*, Perawatan, dan Operasi Lain-Lain. Perseroan tidak menghasilkan pendapatan dari sumber lain, termasuk instrumen keuangan dari hasil penawaran umum bersifat ekuitas. Selain itu, jumlah nilai ekonomi yang didistribusikan mencakup beban usaha, beban pegawai (biaya gaji dan tunjangan pegawai, insentif, biaya kontribusi dana pensiun, imbalan kerja, dan biaya pegawai lainnya), pembayaran pajak penghasilan, dan penyaluran dana TJSL.

Pada tahun 2025, nilai ekonomi yang ditahan mencapai USD53.78 juta. Nilai ini lebih tinggi 134.9% dari tahun sebelumnya ketika GMF mencatatkan nilai positif pada nilai ekonomi yang ditahan, yaitu sebesar USD39.83 juta. Terjadi peningkatan pada pendapatan usaha yang menyebabkan perbedaan nilai ekonomi yang ditahan pada tahun 2025 dibandingkan 2024.

Seiring dengan peningkatan pendapatan, Perseroan mampu memberikan kontribusi lebih besar kepada negara melalui peningkatan pembayaran pajak menjadi USD15.3 juta dibandingkan tahun sebelumnya sebesar USD13.1 juta.

IMBALAN PASCA-KERJA PEGAWAI [GRI 2-30, 201-3]

Perseroan memberikan imbalan pascakerja untuk karyawan sesuai dengan Undang-Undang Ketenagakerjaan No. 13/2003. Pada tahun 2021, Perusahaan telah menerapkan Undang-Undang No. 11 Tahun 2020 tentang Cipta Kerja.

The economic value generated by the Company primarily stems from business income, which can be divided into three main components: Repairs and Overhaul, Maintenance, and Other Operations. The Company does not generate income from other sources, such as financial instruments resulting from equity public offerings. Meanwhile, the distributed economic value was paid for business expenses, employee expenses (including salaries and employee benefits, incentives, pension fund contribution costs, employee rewards, and other employee costs), income tax payments, and fundings for TJSL.

In 2025, the retained economic value reached USD53.78 million. This figure marks a 134.9% increase compared to the previous year when GMF reported a retained economic value of USD39.83 million. This increase in retained economic value between 2025 and 2024 occurred primarily due to the increase in revenues.

Furthermore, in line with the revenue increase, the Company has substantially increased its contribution to the country by enhancing income tax payments to USD15.3 million compared to USD13.1 million in the previous year.

EMPLOYEES POST-EMPLOYMENT BENEFITS [GRI 2-30, 201-3]

The Company provides post-employment benefits to employees in accordance with Employment Law No. 13/2003. In 2021, the Company has implemented Law No. 11 of 2020 concerning Job Creation.

Perseroan menyediakan imbalan pasca-kerja berupa program iuran pasti dan manfaat pasti dan imbalan kerja jangka panjang lain untuk karyawan yang memenuhi persyaratan program. Sesuai dengan amandemen Perjanjian Kerja Bersama (PKB) dan Peraturan Grup (PP) pada tahun 2016, Perseroan menyelenggarakan tambahan program pensiun iuran pasti. Oleh karena itu Perseroan mengikutsertakan karyawannya dalam program pensiun iuran pasti yang dikelola BNI. Perseroan membayar kontribusi iuran sebesar 6% dari gaji dasar pegawai dan ditambah iuran khusus untuk pegawai yang akan pensiun.

Beban iuran pasti yang diakui dalam beban operasi sebesar USD4,04 juta pada tahun 2025.

BANTUAN FINANSIAL YANG DITERIMA DARI PEMERINTAH [GRI 201-4]

Sepanjang tahun 2025, Perseroan tidak mendapatkan bantuan finansial dari pemerintah. Namun demikian, dengan Kebijakan Ekonomi yang dikeluarkan oleh pemerintah yaitu "*Bonded & Inventory Control*" terkait penetapan tarif 4 HS serta pembebasan/perubahan persentase Bea Masuk (BM) 21 HS Code menjadi 0% sangat meringankan beban Perseroan karena diberlakukan untuk kategori *part* yang sering diimpor oleh GMF guna menunjang perawatan pesawat.

PROPORSI PENGELUARAN UNTUK PEMASOK LOKAL [GRI 204-1]

Pendekatan pengadaan GMF dirancang untuk memenuhi standar industri. Oleh karena itu, Perseroan terkadang memilih untuk membeli barang dan jasa dari luar negeri apabila produk atau jasa lokal tidak tersedia atau tidak memenuhi standar. Mengingat sifat material dan suku cadang dalam sektor MRO penerbangan yang sangat spesifik, hanya sejumlah kecil pemasok lokal yang mampu memenuhi spesifikasi teknis GMF. Sebaliknya, penyedia jasa relatif lebih banyak tersedia di dalam negeri, mengingat GMF membutuhkan berbagai layanan pendukung selain untuk kegiatan usaha intinya di sektor MRO.

Pada tahun 2025, Perseroan menghabiskan total sebesar Rp 127.508.076.076 untuk pengadaan barang dan jasa dari pemasok lokal dan nasional, yang melibatkan sebanyak 19 perusahaan pemasok.

The Company provides post-employment defined contribution plans, defined post-employment plans and other long-term benefits covering its qualifying employees for each program. In accordance with the amendments to the Cooperation Employment Agreement (PKB) and the Company Regulation (PP) in 2016, the Company provides an additional defined contribution pension plan. Accordingly, the Company enrolled its employees in the defined contribution pension program which is managed by Dana Pensiun Lembaga Keuangan (DPLK) BNI. The Company pays a contribution fee of 6% of employees' basic salaries and additional specific contributions for retiring employees.

Contribution expenses recognised under operating expenses amounted to USD4,04 million in 2025.

FINANCIAL ASSISTANCE RECEIVED FROM GOVERNMENT [GRI 201-4]

Throughout 2025, the Company did not receive financial assistance from the government. However, the "*Bonded & Inventory Control*" policy issued by the government regarding the 4 HS tariff and the exemption/amendment of the 21 HS Code of Import Duty (BM) to 0% greatly eased the Company's expenses in terms of imported parts for aircraft maintenance.

SPENDING PROPORTION FOR LOCAL SUPPLIERS [GRI 204-1]

GMF's purchasing approach is designed to comply with industry standards. As a result, the Company may at times procure goods and services from overseas when local products or services are either unavailable or do not meet the required standards. Given the highly specific nature of materials and spare parts in the airline MRO sector, only a limited number of local suppliers are able to meet GMF's technical specifications. In contrast, service providers are more readily available locally, as GMF requires various supporting services in addition to its core MRO business activities.

In 2025, the Company spent Rp 127.508.076.076 billion on goods and services sourced from local and national suppliers, involving a total of 19 supplier companies.

Pada tahun 2025, secara garis besar, hasil pengukuran lingkungan memenuhi baku mutu yang menjadi acuan (kualitas air limbah, kualitas udara ambien, kualitas emisi udara dari sumber tidak bergerak, dan kebisingan lingkungan).

PENGUNAAN MATERIAL DAN UPAYA EFISIENSI [OJK F.5]

Material merupakan bahan-bahan/materi-materi dasar yang digunakan dalam kegiatan yang dilakukan Perseroan. Material yang digunakan dalam proses bisnis mencakup bahan bakar minyak (solar) untuk transportasi *ground support equipment*, bahan berbahaya dan beracun (B3) atau kimia, serta penggunaan kertas untuk administrasi. Bahan baku tersebut bukan bahan baku yang langsung diambil dari alam (*raw material*), melainkan dibeli dari pemasok eksternal (*supplier*).

Informasi volume penggunaan material dalam adalah sebagai berikut:

Jenis Material Material Type	Satuan Unit	2025	2024	YoY 2024-2025
Solar Diesel Fuel	Liter	299,196	207,778	43,99%
Kimia Chemistry	Ton	216,231	273,062	(20,8%)
Kertas Paper	Rim	25,889	24,137.71	7,25%

Pada tahun 2025, pemakaian solar meningkat menjadi 299.196 liter, atau kenaikan sebesar 43,99% dibandingkan tahun 2024. Peningkatan ini sejalan dengan bertambahnya intensitas kegiatan operasional serta peningkatan utilisasi peralatan dan kendaraan *ground support equipment* berbahan bakar solar selama periode pelaporan, sebagai bagian dari kebutuhan operasional Perseroan. Penggunaan material kimia Perseroan pada tahun 2025 mengalami penurunan menjadi sebesar 216,231 ton ton atau 20,8% lebih rendah dibandingkan tahun 2024. Hal ini terjadi karena karena pelaksanaan kegiatan operasional di area produksi yang menggunakan bahan kimia relatif berkurang atau tidak ada kebutuhan project pekerjaan yang membutuhkan bahan kimia dalam jumlah besar.

Perseroan terus menjaga penggunaan material kimia dengan terus mempertahankan sistem *consignment* yang terbilang efektif. Melalui sistem ini, ketika material tersebut tidak digunakan di Perseroan maka dapat dikembalikan kembali ke pihak *supplier*. Ini merupakan upaya Perseroan dalam mengurangi timbulan limbah B3 dari sumber.

Sementara itu, penggunaan material kertas tahun 2025 mengalami peningkatan menjadi sebesar 25.889 rim atau naik 7,25 % dibandingkan tahun 2024. Hal ini dikarenakan beberapa aktivitas perkantoran mengalami

In 2025, in general, the environmental measurement had met the standards reference (wastewater quality, ambient air quality, air emission-quality from stationary sources, and environmental noise).

Materials are the basic materials that the Company used in the operation. The materials in business processes include fuel oil (diesel) for transportation of ground support equipment, hazardous and toxic materials (B3) or chemicals, and paper for administration purposes. These raw materials are not taken directly from nature but are purchased from suppliers.

Information on how much material the Company used in the past two years is as follows:

In 2025, diesel fuel consumption will increase to 299,196 liters, or an increase of compared to 2024. This increase is in line with the increased intensity of operational activities and increased utilization of diesel-fueled ground support equipment and vehicles during the reporting period, as part of the Company's operational needs. The Company's chemical material usage in 2025 also decreased to 216,231 tons or 20,8% lower than in 2024. This is due to operational activities in the production area that use chemicals were relatively reduced, or there were no project requirements that required large quantities of chemicals.

The Company continues to maintain the use of chemical materials by maintaining an effective consignment system. Through this system, when the material is not used in the Company, it can be returned back to the supplier. This is the Company's effort to reduce the generation of B3 waste from the source.

Meanwhile, the use of paper material in 2025 has increased to 25,889 reams or increased by 7,25 % compared to 2024. This is due to Several office activities experienced an increase in the need for paper usage in

kenaikan kebutuhan penggunaan kertas dalam kegiatan keseharian. Berbagai inisiatif yang terus dilakukan dari tahun ke tahun yaitu:

Dalam Laporan Keberlanjutan ini, emisi yang dilaporkan adalah emisi GRK langsung (cakupan 1) yang dihasilkan dari penggunaan bahan bakar minyak dan emisi GRK (cakupan 2) tidak langsung yang bersumber dari

The table shows that the Company's total energy consumption in 2025 will increase to 95,989.67 GJ, or 13.25% higher than in 2024. This increase is in line with the increased intensity of operational activities throughout the reporting year, particularly in aircraft maintenance activities for the General Aviation (GA) and Non-General Aviation (NGA) segments, as described in the Review of Operations by Business Segment in this Integrated Report.

The Company recognizes that operational growth has implications for increased energy consumption. Therefore, the Company consistently implements various energy efficiency and control programs to ensure that energy use is managed in a measured, controlled manner and in line with its commitment to sustainable operational practices: [OJK F.12]

1. Implementation of the Continuous Saving Energy program, which is a reduction in the use of electrical energy in the form of turning off office lights during breaks, reducing the use of AHU after office hour (after 16.00 WIB).

GENERATED EMISSION [GRI 305-1, 305-2, 305-4, 305-5] [OJK F.11]

Greenhouse Gas (GHG) emissions are detrimental to global warming and climate change. The Company is dedicated to contribute in reducing emission of carbon dioxide (CO₂) concentrations resulting from electricity and fuel usage.

In this Sustainability Report, the disclosed emissions include direct GHG emissions (scope 1) from the use of fuel and indirect GHG emissions (scope 2) from electricity consumption. The Company has decided

penggunaan listrik. Perseroan belum memutuskan untuk melaporkan emisi GRK (cakupan 3) tidak langsung lainnya dari perjalanan dinas dengan pesawat terbang. Emisi GRK dominan yang dihasilkan dari cakupan 1 dan 2 adalah CO₂. Perseroan menggunakan metode penghitungan emisi GRK cakupan 1 dari *Intergovernmental Panel on Climate Change* (IPCC) dengan menggunakan faktor emisi lokal (tier 2) yang telah ditetapkan Badan Penelitian dan Pengembangan Energi dan Sumber Daya Mineral (Balitbang ESDM) dan Direktorat Jenderal Ketenagalistrikan di bawah naungan Kementerian ESDM.

Dalam melaporkan emisi hasil penggunaan listrik, Perseroan menggunakan faktor konversi emisi listrik *average grid emission factor* yang dikeluarkan Kementerian ESDM pada dokumen Rencana Usaha Penyediaan Tenaga Listrik (RUPTL) PLN 2015-2024.

Perseroan memiliki komitmen untuk mengurangi emisi dan mendukung Pemerintah Indonesia dalam mencapai *Net Zero Emissions* (NZE) 2060, namun Perseroan tidak memiliki target khusus ataupun tahun pencapaian target internal untuk menurunkan emisi GRK. Selain itu, Perseroan juga tidak memiliki manajemen untuk mengawasi pengendalian iklim. Perseroan juga belum memiliki target khusus terkait pencapaian target NZE. Selain itu, Perseroan juga tidak memiliki peraturan atau dokumen internal perusahaan terkait hal tersebut. [E-06, E-07]

not to report other indirect GHG emissions (scope 3) related to business travel by airplane. The GHG emissions from scopes 1 and 2 are dominated by CO₂. The Company utilizes the Intergovernmental Panel on Climate Change (IPCC) method for calculating scope 1 GHG emissions, employing local emission factors (tier 2) specified by the Energy and Mineral Resources Research and Development Agency (Balitbang ESDM) and the Directorate General of Electricity under the Ministry of EMR.

When reporting emissions from electricity consumption, the Company adopted the electricity emission conversion factor based on the average grid emission factor provided by the Ministry of Energy and Mineral Resources in the 2015-2024 PLN Electricity Procurement Plan (RUPTL) document.

The Company is committed to reducing emissions and supporting the Indonesian Government in achieving Net Zero Emissions (NZE) 2060, however, the Company does not have specific internal targets or a timeline for reducing GHG emissions. Additionally, the Company does not have a management system to oversee climate control efforts and has not set specific targets for NZE achievement. Additionally, there are also no internal regulations or company documents related to this matter. [E-06, E-07]

EFISIENSI PENGGUNAAN AIR [GRI 303-5] [OJK F.8]

Perseroan membutuhkan air untuk berbagai keperluan operasional mencakup sanitasi karyawan, bangunan kantor, rumah dinas, serta pencucian pesawat dan *spare part*. Sejak awal beroperasi hingga tahun pelaporan, Perseroan tidak menggunakan air tanah dan hanya menggunakan sumber air yang berasal dari Perusahaan Daerah Air Minum (PDAM). Dengan demikian, pada tahun 2025, tidak terdapat pelaporan mengenai adanya sumber air yang secara signifikan dipengaruhi oleh pengambilan air oleh GMF.

Perseroan tetap mengukur volume penggunaan air dengan menggunakan metode observasi dan pencatatan angka yang tertera pada *flowmeter* karena cara ini dinilai paling akurat. Pencatatan dilakukan dengan melihat angka yang tertera pada awal dan akhir bulan untuk dihitung selisih nilainya. Berdasarkan pencatatan tersebut, volume penggunaan air pada tahun 2025 adalah sebesar 269,606 m3. Terjadi kenaikan 65,98% dari pemakaian sebesar 162,439 m3 pada tahun 2024 dikarenakan peningkatan intensitas kegiatan operasional serta bertambahnya kebutuhan air untuk mendukung aktivitas produksi dan fasilitas penunjang selama periode pelaporan. [ESG E-04]

Perseroan memiliki kebijakan efisiensi penggunaan air yang diatur dalam Surat Edaran Nomor: DC/SE-7002/18 tentang Penghematan Energi Listrik dan Air Bersih di Lingkungan Perseroan. Surat ini mewajibkan kepada seluruh karyawan di lingkungan GMF agar melakukan upaya penghematan penggunaan air dalam setiap kegiatannya. Upaya penghematan air merupakan upaya berkelanjutan dari tahun ke tahun yang dilakukan melalui kampanye penghematan air melalui stiker hemat air yang ditempelkan pada wastafel, toilet dan keran wudu musala.

PENGELOLAAN LIMBAH [OJK F.14]

Aktivitas operasional Perseroan menghasilkan limbah, baik cair maupun padat, B3 maupun non-B3. Perseroan mengelola limbah operasional secara sistematis guna mencegah terjadinya pencemaran dan kerusakan lingkungan. Komitmen tersebut diwujudkan melalui kebijakan Health, Safety and Environment (HSE) yang telah ditandatangani oleh Direktur Utama pada 1 Juni 2017, serta penerapan Prosedur HSE 5-02 tentang Pengelolaan Limbah Bahan Berbahaya dan Beracun (B3) yang disusun mengacu pada Peraturan Pemerintah Nomor 101 Tahun 2014 tentang Pengelolaan Limbah B3 dan peraturan terkait lainnya yang berlaku di Indonesia.

Sebagai penguatan aspek kepatuhan, pada tahun pelaporan Perseroan juga telah memperoleh Hasil Verifikasi Teknis atas Rincian Teknis Penyimpanan Limbah B3 (TPS Limbah B3) dari DLHK Provinsi Banten, dengan status kelengkapan dan muatan dinyatakan lengkap dan sesuai.

EFFICIENT WATER USAGE [GRI 303-5] [OJK F.8]

The Company needs water to operate and that includes sanitation for employees, office buildings, boarding houses, and clean aircraft and spare parts. From its establishment until the current reporting year, the Company did not use groundwater and has only been using water from the Regional Drinking Water Company (PDAM). Hence, in 2025, there were no reports of a Company's action that had significantly reduced water resources.

The Company continues to measure water use through observation and record the numbers on the flowmeter since this is still the most accurate method for the Company. The recording is done through calculation between the numbers at the beginning and end of the month. Based on these records, water usage in 2025 will be 269,606 m3. This represents a 65.98% increase from the 162,439 m3 used in 2024 due to increased operational intensity and additional water requirements to support production activities and supporting facilities during the reporting period. [ESG E-04]

The Company has a policy to make water usage more efficient through a Circular Letter Number: DC/SE-7002/18 concerning Energy Saving of Electricity and Clean Water. This letter requires all employees working at the GMF to save water. Conserving water are carried out on an ongoing basis from year to year through water-saving campaigns, including the placement of water conservation stickers on washbasins, toilets, and ablution faucets in the prayer rooms.

WASTE MANAGEMENT [OJK F.14]

The Company's operational activities generate both liquid and solid waste, hazardous and non-hazardous. The Company manages operational waste systematically to prevent pollution and environmental damage. This commitment is manifested through the Health, Safety and Environment (HSE) policy signed by the President Director on June 1, 2017, as well as the implementation of HSE Procedure 5-02 concerning the Management of Hazardous and Toxic Waste (B3), which was prepared with reference to Government Regulation No. 101 of 2014 concerning the Management of B3 Waste and other relevant regulations applicable in Indonesia.

To strengthen compliance, during the reporting year the Company also obtained Technical Verification Results for Technical Details of B3 Waste Storage (TPS Limbah B3) from the Banten Provincial DLHK, with the status of completeness and content declared complete and compliant.

Pencapaian ini menegaskan bahwa pengelolaan Limbah B3 Perseroan telah memenuhi persyaratan teknis dan regulatif yang ditetapkan oleh otoritas lingkungan hidup. [306-1]

Perseroan mengelola limbah non-B3 yang terdiri dari kertas tidak terpakai dan *grey water* berupa air kotor berdasarkan Ketentuan Kementerian Lingkungan Hidup (KLH) dan standar industri terkait agar tidak menimbulkan dampak negatif terhadap lingkungan. Perseroan mengelola limbah kertas menggunakan metode *reuse and reduce*, sedangkan limbah *grey water* dari limbah domestik seperti air cucian piring, *flushing* toilet, dan sebagainya disalurkan ke STP (*Sewage Water Treatment*) Angkasa Pura II. Perseroan juga menerapkan cara *composting* untuk mengelola sampah organik berupa dedaunan menjadi pupuk kompos. Cara ini terbilang efektif untuk mengurangi timbunan sampah organik yang diangkut ke Tempat Pemrosesan Akhir (TPA) untuk dibakar sehingga mengurangi gas CH₄ hasil pembakaran sampah. [306-1]

Informasi volume limbah yang dihasilkan adalah sebagai berikut: [F.13]

Pengelolaan penggunaan material kimia melalui sistem *consignment* seperti yang telah dijelaskan sebelumnya turut membantu menjaga tingkat volume limbah berbahaya yang dihasilkan dari aktivitas operasional. Salah satunya adalah pada Turco Oil. Dalam mengelola limbah B3, GMF mengacu pada Peraturan Pemerintah No. 22 Tahun 2021 tentang Penyelenggaraan Perlindungan dan Pengelolaan Lingkungan Hidup tersebut dilakukan dari mulai proses pengemasan, penyimpanan, hingga pengangkutan dan pengolahan oleh badan usaha yang memiliki izin dari KLH dan Departemen Perhubungan RI. [306-2]

Berikut disampaikan informasi mengenai volume dan metode pengelolaan limbah B3: [306-5]

This achievement confirms that the Company's hazardous waste management has met the technical and regulatory requirements set by the environmental authorities. [306-1]

The Company manages its non-B3 waste, comprised of unused paper and dirty water, according to the Ministry of Environment (KLH) regulation and industry standards to protect the environment. The Company manages its paper waste using the reuse and reduce method, while gray water waste from domestic waste that came from dishwashing, toilets, etc, is channeled to Angkasa Pura II's STP (*Sewage Water Treatment*). The Company also uses composting methods to turn leaves into compost. This is an effective method to reduce the volume of organic waste to be burned at the Final Processing Site (TPA), hence reducing CH₄ gas coming from the burning. [306-1]

Information on the waste volume generated is as follows: [F.13]

The chemical materials are managed through a *consignment* system, as discussed earlier, to maintain the volume of hazardous waste from operational activities. One of them is Turco Oil. In managing hazardous waste, GMF refers to Government Regulation No. 22 of 2021 concerning Environmental Protection and Management from the packaging, storage, transportation, and processing which are all done by a business entity that has a license from KLH and the Ministry of Transportation of the Republic of Indonesia. REKRUTMEN [GRI 401-1]

RECRUITMENT [GRI 401-1]

Metode Perekrutan Karyawan
Employee Recruitment Methods

Metode Perekrutan Karyawan

Secara spesifik, sepanjang tahun 2025, GMF melakukan perekrutan karyawan guna memenuhi MPP (*Manpower Planning*) melalui beberapa cara.

Berdasarkan pemetaan MPP, selanjutnya ditindaklanjuti dengan melakukan pemenuhan kebutuhan dari internal perusahaan terlebih dahulu. Sebagai salah satu bentuk pengembangan karir, karyawan yang memiliki kapabilitas yang sesuai dapat melakukan mutasi lintas dinas sehingga dapat mendukung pemenuhan target bisnis Perseroan. Selain melakukan mutasi, karyawan yang menunjukkan performa kerja terbaik serta memenuhi persyaratan jabatan yang lebih tinggi diberi kesempatan untuk promosi agar bisa memberikan kontribusi lebih aktif di dalam Perseroan.

Selain melakukan promosi serta mutasi karyawan, cara lain yang dilakukan GMF guna memenuhi MPP yaitu dengan melakukan rekrutmen eksternal. Pada tahun 2025, proses rekrutmen dilakukan dengan melakukan *make* dan/atau *buy*.

Rekrutmen *make* dilakukan dengan memilih kandidat *fresh graduate* dari lulusan D3, dan Perguruan Tinggi. Setelah diangkat, nantinya mereka akan mengikuti berbagai tahap pengembangan sesuai dengan ketentuan. GMF bekerja sama dengan sejumlah institusi untuk mendapatkan kandidat terbaik. Melalui rekrutmen *make*, GMF bertujuan untuk mencetak teknisi, *engineer*, *planner*, dan *inspector*.

Rekrutmen *buy* lebih difokuskan kepada kandidat profesional/ahli yang nantinya akan diperkenalkan langsung dengan bisnis, organisasi, sistem dan prosedur, serta budaya perusahaan dari GMF. Rekrutmen *buy* digunakan saat Perseroan membutuhkan karyawan pada level tertentu seperti *aircraft maintenance engineer*, *internal auditor*, *treasury management*, *Legal & Corporate Governance Expert*.

Employee Recruitment Methods

Throughout 2025, GMF specifically carried out employee recruitment to fulfill Manpower Planning (MPP) through several approaches.

Based on MPP mapping, the next step was to fulfill workforce needs internally first. As part of career development, employees with the appropriate capabilities could undergo cross-department transfers to support the Company's business targets. In addition to transfers, employees who demonstrated outstanding performance and met the requirements for higher positions were given the opportunity for promotion to contribute more actively to the Company.

In addition to promotions and employee transfers, GMF also conducted external recruitment to fulfill MPP. In 2025, recruitment was carried out through *make* and/or *buy* approaches.

The *make* recruitment approach involved selecting fresh graduates from D3 and university programs. Once hired, they would undergo various development stages according to company policies. GMF collaborated with several institutions to acquire the best candidates. Through the *make* recruitment approach, GMF aimed to develop technicians, engineers, planners, and inspectors.

The *buy* recruitment approach focused on professional/expert candidates, who would be introduced directly to GMF's business, organization, systems and procedures, and corporate culture. The *buy* recruitment approach was used when the company required employees at specific levels, such as aircraft maintenance engineers, internal auditors, treasury management personnel, and Legal & Corporate Governance Experts.

Seluruh calon karyawan GMF wajib memenuhi syarat yang ditetapkan oleh Perseroan, yakni berusia minimum 18 tahun sesuai ketentuan Undang-Undang No. 13 Tahun 2003 tentang Ketenagakerjaan Pasal 68 dan Konvensi ILO 138 tentang Usia Minimum untuk Diperbolehkan Bekerja. GMF juga tidak menerapkan praktik kerja paksa karena jam kerja karyawan telah ditetapkan dalam kontrak sesuai dengan undang-undang ketenagakerjaan yang berlaku. Persyaratan ini juga berlaku bagi mitra kerja yang bekerja sama dengan Perseroan. Sepanjang tahun 2025, GMF tidak pernah merekrut karyawan di bawah umur (di bawah 18 tahun) sehingga tidak terdapat insiden karyawan di bawah umur yang dipekerjakan oleh Perseroan maupun mitra kerja yang bekerja sama dengan Perseroan. [OJK F.19] [ESG S-10]

Program Management Trainee

Rookie Development Program (RDP) pertama kali dilaksanakan tahun 2023. Ini adalah sebuah program yang dilaksanakan selama dua tahun untuk membekali *Rookies* (karyawan baru) dengan pengetahuan, *leadership skill* dan *attitude* yang selaras dengan AKHLAK BUMN agar siap ditempatkan di perusahaan yang tergabung di Garuda Indonesia Group pada berbagai posisi seperti Engineering, Planning dan Business Support.

Hasil Rekrutmen 2025

Pada tahun 2025, GMF telah melakukan rekrutmen terhadap 275 karyawan baru tetap dan tidak tetap. Jumlah tersebut setara 5,5% dari jumlah keseluruhan karyawan pada tahun 2025. [ESG G-03]

Rekrutmen ini mengalami penurunan sebesar 56,4% dibandingkan rekrutmen tahun 2024 saat GMF melakukan rekrutmen 631 karyawan baru. Penurunan rekrutmen ini terutama dipengaruhi oleh penyesuaian tahapan proses seleksi pada tahun 2025, dimana seluruh proses rekrutmen dikelola secara penuh oleh GMF, termasuk pelaksanaan English Test dan Medical Check Up (MCU) yang diselenggarakan secara langsung oleh perusahaan. Selain itu, keterbatasan kapasitas peserta pada tahap English Test dan Psikotes menyebabkan pelaksanaan tes harus dilakukan secara bertahap, sehingga jumlah kandidat yang dapat diproses dalam satu waktu menjadi lebih terbatas dan durasi proses rekrutmen relatif lebih panjang dibandingkan tahun sebelumnya.

All GMF job candidates were required to meet the company's stipulated conditions, including a minimum age of 18 years, in accordance with Law No. 13 of 2003 on Employment, Article 68, and ILO Convention 138 on the Minimum Age for Admission to Employment. GMF also did not practice forced labor, as employee working hours were contractually regulated in compliance with labor laws. These requirements also applied to GMF's business partners. Throughout 2025, GMF did not recruit underage employees (under 18 years old), ensuring that no incidents of underage employment occurred within the company or its partner organizations. [OJK F.19] [ESG S-10]

Rookie Development Program

The Rookie Development Program (RDP) was first implemented in 2023. This is a two-year program designed to equip Rookies (new employees) with knowledge, leadership skills, and attitudes aligned with AKHLAK BUMN values, ensuring they are prepared for placement in companies within the Garuda Indonesia Group across various positions, such as Engineering, Planning, and Business Support.

2025 Recruitment

In 2025, GMF recruited 275 new permanent and non-permanent employees. These numbers are equal to 5,5% of total number of employees in 2024. [ESG G-03]

This recruitment saw a 56,4% decrease compared to 2024, when GMF hired 631 new employees. The decline in recruitment was primarily due to adjustments to the selection process in 2025, with the entire recruitment process now fully managed by GMF, including the English Test and Medical Check-Up (MCU), which were administered directly by the company. Furthermore, limited participant capacity for the English Test and Psychometric Test phases necessitated a phased implementation of the tests, limiting the number of candidates that could be processed at any one time and extending the recruitment process relatively significantly compared to the previous year.

TINGKAT PERPUTARAN PEGAWAI

GMF menghitung tingkat perputaran pegawai (*turnover*) setiap tahunnya sebagai salah satu dasar untuk menerapkan manajemen SDM yang tepat, berfokus pada optimalisasi produktivitas dan memastikan loyalitas pegawai. Hasil perhitungan *turnover rate* juga menunjukkan tingkat kompetitif GMF sebagai perusahaan tujuan utama para pencari kerja di industri MRO secara nasional. Walaupun tidak memiliki persaingan yang ketat dengan pemain MRO lainnya secara nasional, namun GMF juga memastikan bahwa para pegawai merasa puas bekerja di Perseroan.

Jumlah karyawan yang meninggalkan Perseroan selama tahun 2025 adalah 224 orang atau 4,46% dari jumlah keseluruhan karyawan pada tahun 2025. [ESG S-03]

EMPLOYEE TURNOVER

GMF calculates the employee turnover rate annually as one of the bases for implementing appropriate HC management practices, with a focus on optimizing productivity and ensuring employee loyalty. The results of the turnover rate calculation also indicate GMF's competitiveness as the primary destination for job seekers in the MRO industry nationally. Despite not facing stiff competition from other MRO players nationally, GMF ensures that employees feel satisfied working at the Company.

The number of employees who left the Company during 2025 was 224 individuals or 4,46 % of the total number of employees in 2025. [ESG S-03]

PENILAIAN KINERJA PEGAWAI & MANAJEMEN KARIER

EMPLOYEE ASSESSMENT & CAREER MANAGEMENT

GMF menerapkan sistem manajemen kinerja yang berdasarkan tiga proses yaitu perencanaan, pengelolaan kinerja, dan evaluasi untuk menilai kinerja para pegawai (*assessment*).

GMF implements a performance management system (planning, performance management, and evaluation) to assess employee performance.

Individual Performance Plan (IPP) ditetapkan sebagai sasaran kinerja yang merupakan turunan dari KPI atau Target Unit dan Dinasnya. Kinerja pegawai dipantau dan dinilai dengan *Individual Performance Tracking* (IPT). Selain itu, penilaian juga dilakukan terhadap pegawai mengenai kriteria GMF Spirit, core competencies dan managing people competencies (level struktural) yang menggabungkan informasi dari atasan, rekan kerja, bawahan dan diri sendiri. Hasilnya akan dilaporkan dalam *Individual Performance Report* (IPR). Keempat proses tersebut dilakukan dengan menggunakan sistem *online*, yaitu MyHC (*Talent Management System*).

The *Individual Performance Plan* (IPP) becomes the performance basis derived from the KPI or Target Unit of its Department. *Individual Performance Tracking* (IPT) will monitor and assess employee performance. In addition, employees are assessed based on GMF Spirit, core competencies, and managing people competencies (for structural levels), incorporating input from supervisors, peers, subordinates, and self-assessments. The results are available in the *Individual Performance Report* (IPR). These three processes are carried out using an online system, namely MyHC (*Talent Management System*).

Atasan masing-masing pegawai menilai kinerja setiap bawahannya secara adil. Penilaian kinerja dilakukan dua kali dalam setahun dan diatur dalam Prosedur Bisnis *Performance Management System* (PMS). Hasil tersebut kemudian menjadi bahan pertimbangan bagi Perseroan dalam memberikan *reward*, *punishment*, serta program pengembangan kepada karyawan. Karyawan dan atasan dapat melakukan dialog/diskusi baik secara daring atau pertemuan tatap muka. Hal ini dapat memberikan kemudahan bagi para karyawan sehingga berdampak kepada waktu kerja yang lebih efektif dan efisien.

Pada tahun 2026, GMF memberikan berbagai jenis reward sesuai dengan hasil penilaian kinerja pegawai. Salah satu bentuk reward adalah pemberian apresiasi kepada 68 pegawai yang dinilai memiliki kinerja terbaik sepanjang tahun 2025 dan memberikan kontribusi di atas rata-rata kepada Perusahaan. Terdapat 3 kategori pemberian apresiasi yaitu:

1. *Most Valuable Employee*, yaitu penghargaan bagi pegawai dengan penilaian kinerja tertinggi dan diberikan hanya kepada 1 (satu) orang di setiap dinasnya.
2. *Outstanding Performer*, yaitu pegawai yang menonjol dalam kinerja dan dedikasinya terhadap pekerjaan. Mereka tidak hanya mencapai target kinerja tetapi juga menunjukkan kemampuan ekstra, inisiatif, dan kontribusi positif terhadap tim dan perusahaan secara keseluruhan. Para *outstanding performer* ini juga menjadi contoh yang menginspirasi bagi rekan-rekannya dan membantu menciptakan lingkungan kerja yang produktif dan positif.
3. *Excellent PDCA*, yaitu pegawai yang diberikan penugasan khusus sebagai PDCA diluar pekerjaan utamanya dan dinilai terbaik dalam mengerjakan tugas PDCA.
4. *People Champion Awards*, yaitu program apresiasi yang diberikan kepada pegawai dengan kinerja unggul serta kontribusi signifikan dalam mendukung pencapaian kinerja organisasi. Penghargaan ini diberikan melalui beberapa kategori yang merepresentasikan keunggulan individu dalam aspek produktivitas, keandalan layanan kepada pelanggan, inovasi, kualitas kerja, kolaborasi, keunggulan operasional, serta penerapan budaya Perusahaan.

The supervisor of each employee conducted a fair evaluation of his subordinate's performance. There is a two-time appraisal program every year, as stipulated in the Performance Management System (PMS) Business Procedure. The Company uses the assessment to give rewards and punishments and development programs to employees. Employees and supervisors will be able to have dialogue/discussion either online or face-to-face meetings. This can provide convenience for employees, resulting in more effective and efficient working time.

In 2026, GMF provides various types of rewards according to the results of employee performance assessments. Special Recognition is part of reward to give appreciation for 68 employees who are considered to have the best performance throughout 2025 and have made above-average contributions to the Company. There are 3 categories of appreciation, namely:

1. *Most Valuable Employee*, an award for employees with the highest performance and given to only 1 (one) person in each department.
2. *Outstanding Performer*, an award for employees who stand out in their performance and dedication to their work. Not only achieve performance targets but also demonstrate extra abilities, initiative, and positive contributions to the team and the company as a whole. These outstanding performers are also inspiring examples for their colleagues and help create a productive and positive work environment.
3. *Excellent PDCA*, an award for employees who are given special assignments as PDCA outside of their main job and are considered the best in carrying out their PDCA tasks.
4. *People Champion Awards*, an appreciation program given to employees with outstanding performance and significant contributions to organizational performance. These awards are presented in several categories representing individual excellence in productivity, customer service reliability, innovation, work quality, collaboration, operational excellence, and the implementation of corporate culture.
